The Routledge Handbook of Organizational Leadership Communication Guowei Jian, Gail T. Fairhurst, 2025-04-30
This handbook captures a rapidly developing body of scholarship to map out the terrain of leadership communication and stimulate interdisciplinary dialogue among leadership communication scholars for future research. The Routledge Handbook of Organizational Leadership Communication surveys various areas of leadership communication, critically assesses their development, and proposes guidance for future research. It begins by addressing prominent theories or emerging theoretical perspectives that help conceptualize leadership communication, ranging from collective leadership approaches and critical perspectives to theories of practice and communicative constitution of organization. The second section focuses on reviewing the latest research on leadership communication in various organizational contexts, such as work teams, hybrid and virtual work contexts, and interorganizational collaboration. Informed by diverse theoretical perspectives, chapters in the final section examine the practice of leadership communication in dealing with both common and novel organizing challenges and processes, for example, the formation and execution of organizational vision and strategies, the use of emerging media technologies, and organizational decision making. The handbook will be an indispensable resource for researchers and advanced students in leadership communication and leadership studies, and practicing managers and consultants in leadership and communication training and development.

Women, Practice, Architecture Naomi Stead, 2016-01-08
The image of the architect is undeniably gendered. While the male architect might be celebrated as the ideal man in Hollywood romantic comedies, blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle, the image of the woman architect is not so clear-cut. While women have been practicing and excelling in architecture for more than a hundred years, their professional identity as constructed in the media is complex and sometimes contradictory. This book explores the working lives and aspirations of women in architectural practice, but more than this, it explores how popular media, newspapers, magazines, and websites serve to define and describe who a woman architect should be, what she should look like, and how she should behave. Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize, the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine, but instead a complex hybrid owing much to historic concepts of genius. Drawing on history, sociology, media analysis, and feminist theories of architectural practice, the book will be of interest to all of those who seek to better understand the image and identity of the architect. This book was published as a double special issue of *Architectural Theory Review*.
