Intelligent Assurance: Artificial Intelligence-Powered Software Testing in the Modern Development Lifecycle

Partha Sarathi Mohapatra,2025-07-27 Traditional testing can't match the speed and reliability demanded in modern software development and releases. This book explains the integration of Artificial Intelligence is transforming software testing enabling smarter, faster and more scalable quality assurance across the development lifecycle. This book demystifies the integration of AI, machine learning and natural language processing into modern testing workflows. From automated test case generation and defect prediction to adaptive test maintenance and intelligent prioritization, it offers practical insights and real-world applications that empower QA teams to deliver higher quality software with greater efficiency. Through a structured, hands-on approach, readers will explore AI-driven testing strategies, tools and architectures that align with DevOps and agile practices. The book also delves into ethical considerations, challenges in AI adoption and the future of autonomous testing agents. Whether you're a software tester, QA lead, DevOps engineer or technology decision maker, this book equips you with the knowledge to embrace AI-driven testing as a strategic advantage in delivering resilient, secure and high performance software.

Artificial Intelligence Application in Networks and Systems Radek Silhavy, Petr Silhavy,2023-07-08 The application of artificial intelligence in networks and systems is a rapidly evolving field that has the potential to transform a wide range of industries. The refereed proceedings in this book are from the Artificial Intelligence Application in Networks and Systems session of the Computer Science Online Conference 2023 CSOC 2023 which was held online in April 2023. The section brings together experts from different fields to present their research and discuss the latest trends and challenges. One of the key themes in this section is the development of intelligent systems that can learn, adapt and optimize their performance in real time. Researchers are exploring how AI algorithms can be used to create autonomous networks and systems that can make decisions without human intervention. Furthermore, this section highlights the use of AI in improving network performance and efficiency. Researchers are exploring how AI algorithms can be used to optimize network routing, reduce congestion and improve the quality of service. These efforts can help organizations save costs and improve user experience.

NextGen Digital Marketing in the Age of AI Hutson, James, Smith, Andrew,2025-06-25 In the evolving landscape of technology, NextGen digital marketing is reshaped by the transformative power of artificial intelligence. AI as traditional strategies give way to data-driven automation, personalized experiences and predictive analytics, businesses harness AI to reach audiences more efficiently and effectively. From chatbots and content generation to customer insights and targeted campaigns, AI enhances digital marketing. This demands that marketers embrace innovation, adapt to emerging tools and rethink connections with modern consumers. NextGen Digital Marketing in the Age of AI outlines the transformative impact of AI on the digital marketing landscape. It contrasts the historical utility of traditional AI for optimizing processes like audience segmentation and predictive analytics with the revolutionary creative capabilities of generative intelligent

technologies This book covers topics such as consumer science generated content and marketing campaigns and is a useful resource for business owners marketers academicians researchers and data scientists

[End-to-End Strategy Execution](#) Charles F. Bowman,William M. Ulrich,2025-12-10 Despite technological and methodological advancements strategy execution failure remains alarmingly common Most projects fail outright or face significant challenges a statistic that has remained consistent for more than two decades While 80% of business leaders believe their companies excel at crafting strategy only 44% believe

their organizations can achieve their strategic goals Nine out of ten leaders admit their execution failures have resulted in missed market opportunities These initiatives that fell short of expectations and ROI have wasted hundreds of billions of dollars Organizations continue this cycle of failure by repeatedly investing in new methodologies third party software systems integrators or silver bullet technologies expecting different results This suggests a fundamental abdication of ownership and responsibility for effective strategy execution Too many organizations fall into the trap of blind loyalty to specific methodologies sometimes abandoning proven practices and even strategic planning itself While various methodologies offer valuable elements leadership must maintain intellectual oversight rather than delegating accountability to third parties with limited stake in long term success End to End Strategy Execution From Inception Through Solution Deployment presents a framework for change to break this cycle of failure This framework is effective because it is methodology agnostic but not methodology illiterate This means it incorporates valuable elements from various approaches while maintaining a cohesive structure that connects strategy formulation to solution deployment This end to end strategy execution framework provides an actionable roadmap covering Strategy formulation Impact assessment Business and IT architecture design Initiative scoping and prioritization Design driven solution deployment Unlike previous frameworks claiming to be end to end this approach incorporates the rigor and integration capabilities needed to deliver on its promise aligning best practices and technologies to streamline every action from strategy to implementation Because the framework addresses every aspect of strategy execution this book is a must read for everyone involved in strategy formulation analysis design and deployment It enables all strategic stakeholders and contributors to understand the scope and extent of their responsibilities as well as the tasks required to deliver any strategic solution on time and within budget *Automation* ,1988
