Revolutionizing Education in the Age of AI and Machine Learning Habib, Maki K., 2019-09-15 Artificial Intelligence AI serves as a catalyst for transformation in the field of digital teaching and learning by introducing novel solutions to revolutionize all dimensions of the educational process leading to individualized learning experiences teachers playing a greater role as mentors and the automation of all administrative processes linked to education AI and machine learning are

already contributing to and are expected to improve the quality of the educational process by providing advantages such as personalized and interactive tutoring with the ability to adjust the content and the learning pace of each individual student while assessing their performance and providing feedback. These shifts in the educational paradigm have a profound impact on the quality and the way we live, interact with each other, and define our values. Thus, there is a need for an earnest inquiry into the cultural repercussions of this phenomenon that extends beyond superficial analyses of AI-based applications in education. *Revolutionizing Education in the Age of AI and Machine Learning* addresses the need for a scholarly exploration of the cultural and social impacts of the rapid expansion of artificial intelligence in the field of education, including potential consequences these impacts could have on culture, social relations, and values. The content within this publication covers such topics as AI and tutoring, role of teachers, physical education and sports, interactive E-learning, and virtual laboratories, adaptive curricula, development support, critical thinking, and augmented intelligence, and it is designed for educators, curriculum developers, instructional designers, educational software developers, education consultants, academicians, administrators, researchers, and professionals.

Teaching AI in Film and Media Studies Bridget Kies, Mel Stanfill, 2025-11-25. A timely intervention into the role of AI in teaching film and media studies, this book offers insights into how scholars and educators can adapt their approaches in the face of emerging technologies. Exploring the intersection of generative AI with film and media studies, this book highlights the importance of addressing AI in the classroom. It advocates for teaching AI literacy as an extension of media literacy, encouraging students to understand AI's biases and limitations. It explores the impact of AI on a variety of widely taught topics, including copyright and remix culture, the concept of authorship, and collaborative storytelling, film and media production, its potential in relation to speculative history and archival research, labor concerns in the media industries, as well as impacts on fans and audiences. The book considers how AI can foster creativity and critical thinking in students as they prepare for future roles in evolving media industries. Each chapter features suggested readings, activities, and assignments that can be implemented in and out of class to reinforce and cultivate AI literacy and proficiency. This book is an essential resource for faculty members in Film and Media Studies who want to know more about how to engage with generative AI tools in their teaching, as well as graduate students taking pedagogy-focused courses.
