**Surveillance Education** Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education

**The Silicon Shrink** Daniel Oberhaus, 2025-02-04 Why the race to apply AI in psychiatry is so dangerous and how to understand the new tech driven psychiatric paradigm AI psychiatrists promise to detect mental disorders with superhuman accuracy provide affordable therapy for those who can't afford or can't access treatment and even invent new psychiatric drugs But the hype obscures an unnerving reality In *The Silicon Shrink* Daniel Oberhaus tells the inside story of how the quest to use AI in psychiatry has created the conditions to turn the world into an asylum Most of these systems he writes have vanishingly little evidence that they improve patient outcomes but the risks they pose have less to do with technological shortcomings than the application of deeply flawed psychiatric models of mental disorder at unprecedented scale Oberhaus became interested in the subject of mental health after tragically losing his sister to suicide In the book he argues that these new ostensibly therapeutic technologies already pose significant risks to vulnerable people and they won't stop there These new breeds of AI systems are creating a psychiatric surveillance economy in which the emotions behavior and cognition of everyday people are subtly manipulated by psychologically savvy algorithms that have escaped the clinic Oberhaus also introduces readers to the concept of swipe psychology which is quickly establishing itself as the dominant mode of diagnosing and treating mental disorders It is not too late to change course but to do so means we must reckon with the nature of mental illness the limits of technology and what it means to be human
