Proceedings of the 13th National Technical Seminar on Unmanned System Technology 2023—Volume 1 Zainah Md. Zain, Zool Hilmi Ismail, Huiping Li, Xianbo Xiang, Rama Rao Karri, 2024-09-21 This book comprises the proceedings of the 13th National Technical Symposium on Unmanned System Technology 2023 NUSYS 23 held on October 2-3, 2023. It covers a number of topics including intelligent robotics, novel sensor technology, control algorithms, acoustics, signal processing, imaging techniques, biomimetic robots, green energy sources, and underwater communication backbones and protocols, and it appeals to researchers developing marine technology solutions and policy makers interested in technologies to facilitate the exploration of coastal and oceanic regions. This book is part of a 2-volume series of these conference proceedings; it represents Volume 1 in the series. *Human-Computer Interaction* Constantine Stephanidis, Gavriel Salvendy, 2024-09-28 The pervasive influence of technology continuously shapes our daily lives. From smartphones to smart homes, technology is revolutionizing the way we live, work, and interact with each other. Human computer interaction (HCI) is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them, ensuring the seamless integration of interactive systems into our technologically driven lifestyles. The book series contains six volumes providing extensive coverage of the field, wherein each one addresses different theoretical and practical aspects of the HCI discipline. Readers will discover a wealth of information encompassing the foundational elements, state of the art, review in established and emerging domains, analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence, as well as the emergence of diverse societal needs and application domains. These books showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains. Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence (AI) and the Internet of Things (IoT). Provide an extensive exploration of interaction design by examining a wide range of technologies, interaction techniques, styles, and devices. Discuss user experience methods and tools for the design of user-friendly products and services. Bridge the gap between software engineering and human computer interaction practices for usability, inclusion, and sustainability. These volumes are an essential read for individuals interested in human computer interaction research and applications.

Human-Computer Interaction in Various Application Domains Constantine Stephanidis, Gavriel Salvendy, 2024-08-23 Human Computer Interaction (HCI) is a multidisciplinary research and applied field targeted to studying people interacting with information technology and designing usable and efficient systems for them. This book outlines the state of the art of HCI research in the respective domain, such as health, games, transportation, industry, and entertainment. This book bridges the gap between theory and practice by presenting how to apply HCI methods and tools in specific domains. Offers concrete examples of HCI use in real-world situations. Presents case-specific best practices, tips, and tricks. Includes chapters that are well studied and purposefully selected, representing important theoretical, practical, and research.
