The authors' purpose in this seventh book is to demonstrate that everyone possesses creative talent, though it may be latent in some and difficult to bring out in others. The authors/editors also believe that all creative ideas link themselves to other creative ideas to develop something new and useful, be it a concept, a process, or a product. In order to disseminate and perpetuate their belief that the creative impulse resides in all of us, they have asked a host of friends to demonstrate it with essays and practical tips touching on supportive creative environments, strategies that foster and enhance creativity, and assessments that demonstrate creativity has indeed taken place.
