Survey of College Students 2025, Use of College Instruction about Generative AI Primary Research Group, 2025-02-12

The study looks at how students are engaging with generative AI through institutional resources. The study details use of courses, websites, online tutorials, and other means to learn about how to use generative artificial intelligence. The survey highlights the varying levels of usage and the reliance on formal and informal learning methods among college students. Results are based on a 2025 representative survey of 1022 students at 4-year colleges and research universities in the USA. Just a few of this 155-page report's many findings are that 30.14% of students have used academic resources provided by their institution to learn about generative AI. Students at higher cost institutions 20,000 are more likely 36.03% to use academic resources compared to those at lower cost institutions 27.34%. Private school students 35.90% are significantly more likely to use resources compared to public school students 28.43%. International students were more avid users than domestic students of college instructional resources about generative AI. Student complaints about being unable to find information about how to use AI were quite common. Students face challenges such as lack of awareness, institutional discouragement, and unclear policies on AI use. They express a need for more structured education, clear guidelines, and greater access to AI tools. The survey suggests that while institutional resources for learning about generative AI exist, most students rely on informal methods such as peers, AI tools, and online content. There is a clear need to expand structured AI education to better support student learning.

Encouraging College Students' Democratic Engagement in an Era of Political Polarization Angela M. McGowan-Kirsch, 2024-12-15. Higher education helps students along a transformative path to citizenship by providing knowledge and experiences that help them become effective and responsible participants in democracy. The pedagogies discussed in this book vary in the student populations they target, the courses to which they are linked, and the nature of the democratic principles to which students are exposed; nevertheless, the authors maintain a unified commitment to preparing students for a life of democratic citizenship. By teaching students citizenship skills including expressing opinions, working collaboratively, and participating in dialogue and civic reasoning, students prepare to discuss major issues that they face nationally and locally. The authors' discussions of scholarly and practical knowledge about pedagogical strategies such as dialogic and deliberative pedagogies, civility, civic education, and the social contract position educators to help students learn about democracy through experiences and teach them strategies for engaging in productive disagreement. These steps are essential for active democratic engagement beyond the classroom. This goal animates *Encouraging College Students' Democratic Engagement in an Era of Political Polarization*. Each chapter offers insight into how higher education can infuse modern democracy with diverse voices, engaged citizens, and a reframing of political talk.
