Windows Video Editor Made Easy James Bernstein,2021-06-12 Video editing software has

been around for many years and for many years only people who were in the movie business or had a large budget could afford to use such software. Even when your average home videographer was able to afford their own video camera, they still had no reasonable way to edit their movies. Now that everyone has a smartphone and considers themselves a professional movie maker, the need to edit their own footage has dramatically increased. Thankfully, Microsoft has a free app built into Windows that allows anyone with a camera and a computer to make some great looking movies. If you have some basic computer skills and a little creativity, it's not too difficult to create your own movies that will make your viewers think you are a video editing pro. You can even use the footage from your smartphone to create custom videos and add all kinds of fun effects, text, and music to your movies. The goal of this book is to get you up and running with the Windows Video Editor and cover all the things you need to know to get you started on making great looking videos without confusing you at the same time. It sticks with the basics yet covers a wide variety of topics to help you achieve some great looking results without needing to be a movie editing expert. The chapters in the book cover the following topics: Chapter 1 The Video Editor Interface, Chapter 2 Importing Videos Into Your Project, Chapter 3 Editing Your Videos, Chapter 4 Exporting Your Video, Chapter 5 Settings and Additional Features.

An Intelligent Video Editing Automate Framework Using AI and Computer Vision Haolin Xie, Yu Sun, 2022. At present, many video editing software have been created, but what they all have in common is that they require manual work to edit. And it takes a lot of time, and the user needs to watch each frame before editing. In this paper, we have developed a program about AI intelligence. The most important point of this software is that it can automatically focus the face of a person and edit only selected clips of the person to make a complete video. Users only need to prepare the video they want to edit and a photo of the main character. Then upload both to the software, and AI Intelligence will automatically edit it, providing the user with a way to download and save it. After editing the main character they need, we applied our application to an example video using the Marvel character Hawkeye as he appears in End Game and tried many experiments with the clip. Eventually, we tried many experiments with the clip and finally got a video of our selected character. The results show that this software saves the user a lot of time and is highly efficient. All operations are carried out by AI.
