Occupational Therapy and Women's Health Sabina Khan, 2025-03-28 This innovative and comprehensive textbook provides a detailed exploration of the role of occupational therapy in addressing the unique needs of women across the lifespan. Structured into 14 parts, the book begins with the foundations of women's health, delving into its historical evolution, the significance of gender equality in medical research, the implications of employment on women's well-being, intricate sociocultural influences, and the intersection of women and occupation from an occupational therapy perspective. Following this foundational context, the book journeys through diverse areas such as gynecological and obstetric health management, endocrine health, autoimmune conditions, non-cisgender health in the context of women's health, mental health, and biopsychosocial aspects, cardiovascular health, sleep, weight, and lifestyle factors, oncology, neurological health, women's health across the lifespan, inter-partner violence, and trauma-informed care, and special topics in women's health. Women's health is a universal concern that transcends geographical boundaries, cultural differences, and socioeconomic disparities, and this important book will be key reading for both students and practitioners of occupational therapy.

Fundamentals of Innovative Sustainable Homes Design and Construction Avi Friedman, 2023-06-26 This book offers ideas and practices on contemporary design concepts and illustrates them with plans and photographs of outstanding examples. Current planning and design modes of dwellings and neighborhoods are facing challenges of philosophy and form. Past approaches no longer sustain new demands and require innovative thinking. The need for a new outlook is propelled by fundamental changes that touch upon environmental, economic, and social aspects. The depletion of non-renewable natural resources and climate change are a few of the environmental challenges. Increasing costs of material, labor, land, and infrastructure have posed economic challenges, with affordability being paramount among them. Social challenges are also drawing the attention of designers, builders, and homeowners. Walkable communities, aging in place, and multigenerational living are some of the concepts considered. In addition, live-work environments have become part of the economic reality for those who wish to work from home, which has become possible through digital advances. The text would be of interest to scholars working in architecture, urban planning, and construction.
