AI in Language Teaching, Learning, and Assessment

Pan, Fang, 2024-02-12

The introduction of Artificial Intelligence AI has ignited a fervent academic discourse AI s role is as both a powerful ally and a potential adversary in education For instance ChatGPT is a generative AI which mimics human conversation with impressive precision Its capabilities span the educational spectrum from answering questions and generating essays to composing music and coding Yet as with any innovation its advent has sparked a spirited academic dialogue

AI in Language Teaching Learning and Assessment seeks to address these concerns with rigor and thoughtfulness It explores the undeniable drawbacks of AI in language education and offers strategic insights into their prevention It scrutinizes the resources and safeguards required to ensure the ethical and secure integration of AI in academic settings This book lays out the multifaceted benefits of incorporating AI into language teaching learning and assessment Its chapters dissect the transformative impact of AI on pedagogy teaching materials assessment methodologies applied linguistics and the broader landscape of language education development This book is a valuable resource for language learners educators researchers and scholars alike It beckons to those who are keen on exploring and implementing AI in education as well as AI developers and experts seeking to bridge the chasm between technology and language education

Generative AI in Higher Education

Adebowale Owoseni, Oluwaseun Kolade, Abiodun Egbetokun, 2024-09-18

With the integration of generative artificial intelligence AI teachers and learners now have access to powerful tools to enhance their productivity and effectiveness in their work To meet the demands of this dynamic educational landscape teachers must embrace AI to handle repetitive tasks freeing them to focus on more intelligent and humanistic responsibilities For learners responsible use of AI could make learning more fun personalized flexible and enriching This insightful new book explores the evolving role of educators in higher education in a world of rapid technological advancements and provides a practical outline of the available technologies By integrating Generative AI into teaching and learning Higher Education Institutions can contribute to achieving inclusive and equitable quality education a target of the UN Sustainable Development Goals and promote lifelong learning opportunities for all Generative AI can be used to enhance teaching and learning experiences foster creativity and develop new learning experiences in higher education This book is a valuable resource for educators navigating the ever changing landscape of education technology With scientific background practical insights and

actionable tips this book will be of interest to scholars of emerging technologies and innovation in education It will also be of practical use to instructors seeking to harness the power of generative AI enhancing productivity and transforming their approach to personalized learning **Mathematics and Education in an AI Era** Dragana Martinovic, Marcel

Danesi, 2025-04-25 This book focuses on the potential contributions of Artificial Intelligence AI for enhancing mathematics education It includes rationales for an AI oriented pedagogical model such as interdisciplinarity and even sensitivity to crucial world issues such as climate change The chapters in this book highlight what the new age of mathematics education entails concretely covering themes from the utilization of AI directly into classroom pedagogy and the semiotic consequences of what this entails to how mathematics training can be tailored to get students to relate concretely to problems of climate change and to understand the relevance of the differences between symmetry and asymmetry as psychological constructs The overall picture we can glean from these chapters is not mere eclecticism but an integration of disciplinary perspectives into a holistic framework that has great relevance and resonance for mathematics education in the age of AI Artificial

Intelligence (AI) in Social Research Prokopis A. Christou, 2025-04-08 The field of social research is characterized by its broad scope and interdisciplinary nature encompassing the examination of human behaviour societies and various facets of social existence however it is influenced by numerous factors including technological advancements It is therefore no surprise that Artificial Intelligence AI has rapidly become a driving force bringing about substantial transformations within the field The use of AI assisted tools and programmes for the collection analysis and interpretation of both quantitative and qualitative data is increasing at a remarkable pace The implications of utilizing these applications are significant and noteworthy While these technologies present numerous opportunities it is important to acknowledge the accompanying dilemmas and risks associated with this form of technological advancement With a focus on AI s research implications this book explores various considerations and examples across different disciplines of social research Career Services and Workforce Development

Centers for Libraries Raymond Pun, Arpine Eloyan, Michael R.
