Increasingly graduates and anyone who is entering employment need an individual digital presence to stand out and showcase themselves to secure their first professional role This book takes an employability approach to encourage those currently studying or about to enter the world of work to develop a set of skills that enables them to recognise and deliver an effective digital presence firstly for themselves and then for the organisations who would employ them It does not assume any prior technical knowledge and emphasises the value and benefits of creating a presence to actively participate in the digital economy By structuring the chapters incrementally the reader is guided through the development of their own presence while also being given the concepts and tools that will enable them in the future to scale this activity to suit the needs of a startup an SME or a social business By using well-established business principles to design a strategy the reader is guided through the creation of a personal Theory of Change that will enable them to turn an abstract goal into an individual digital presence through a defined series of stages and intermediate change objectives The book then proposes a series of tactics to draw out concrete actions A range of examples and case studies from around the world feature in each

chapter to showcase the range of different types of digital presence that can be created By using a strategic and systematic process this book draws together academic thinking with tangible and highly practical outcomes It is essential reading for advanced undergraduate and postgraduate students studying any discipline related to the digital world particularly digital marketing and digital business entrepreneurship and strategy as well as those taking employability and personal professional development programmes
