Social Media Campaigns Carolyn Mae Kim, Matthew Prince, 2025-08-21 This third edition continues to give students a foundation in the principles of social media strategic communication and marketing necessary for today's communications professionals. In many ways, organizations now have access to more data and connection points than ever before. Yet this abundance requires more strategic and nuanced efforts. At its core, however, one aspect remains the same: The drive to create authentic human connection. Focusing on the principles for effective strategic communication via social media, this text allows readers to learn techniques and skills that transfer to different social media platforms. This edition again takes students through the processes of social listening, strategic design, creative engagement, and evaluation, with expert insights from social media professionals. This third edition includes new insights on AI ethics and organizational strategy that reflect the changing landscape of social media. Expanded insights from industry professionals to equip students with diverse perspectives on leading social media hot topics. Updated case studies and real-world examples that showcase how successful brands are navigating the latest trends in earned media, influencer marketing, and community management. This is an ideal text for undergraduate and postgraduate courses in social/digital media marketing and public relations or a secondary text in broader campaign planning and writing courses. Accompanying gratis online resources include chapter reviews, PowerPoint slides, sample syllabi, in-class exercises, and more.

American Book Publishing Record, 2005 *Waves of Change* Patrick Callioni, 2010 Written in the middle of a global economic crisis, this book is about a better future. Patrick Callioni identifies and describes the major waves of change that are coming our way over the next decade or so and then provides practical advice on what to do or avoid doing to benefit most or suffer least from what is to come. He describes some of the problems with the present regime of regulation: We are regulating to catch the motes of dust floating in the air rather than the beams that end up poking out the eyes of our financial markets and suggests regulation should focus on rewarding the good rather than punishing the bad. He also analyzes some of the behavior that helped to create the Credit Crunch: They took healthy debt, mortgage debt that was likely to be repaid, mixed it up with toxic debt, mortgage debt not likely to be repaid, and then sold the debt on as prime safe debt, creating untold damage. Then he presents the waves of change that are coming: the challenges of new technologies, the business opportunities opened by reactions to climate change, and demographic changes as workers and managers are no longer predominantly baby boomers. He also warns of future signs of impending financial setbacks that should be avoided: A financial crisis will occur only when the fuel is there in the form of an investment bubble. In his previous book, *Compliance and Regulation in the Financial Services Industry*, Patrick Callioni successfully predicted most of the course of the current economic downturn. Over-regulation is as dangerous as under-regulation, so he proposes the creation of a federated network of trust. Throughout this exciting book, he emphasizes the increasing importance of knowledge capital, value that is not captured by existing accounting standards, and in particular, soft intangibles: knowledge, assets, time, assets, motivational assets, etc., and he proposes guidance on their measurement and profitable management.
