Report 2013 World Bank,2012-10-15 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers

answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success

National gender profile of agriculture and rural livelihoods Food and Agriculture Organization of the United Nations, The Country Gender Assessment CGA for Tajikistan offers a comprehensive analysis of gender equality in agriculture and rural development It identifies key gender disparities examines their root causes and impacts and proposes actionable recommendations for gender responsive policies Despite being the main agricultural workforce and playing a critical role in food security women s contributions remain undervalued under recognized and largely unpaid With increasing male outmigration from rural areas women s roles on farms are expanding underscoring the urgent need to invest in their empowerment to boost agricultural productivity enhance food security and drive sustainable rural development

Preventing Mental Ill-Health Jennifer Newton, 2013-05-07 Is there any evidence that we can reduce the incidence of mental ill health Is it possible to prevent recurrence of mental ill health Aspirations to achieve both these goals have featured in mental health policy and practice for over 100 years This comprehensive and accessible book draws on research on the development and persistence of behavioural problems in childhood adult depression and schizophrenia The association between social disadvantage and mental ill health as well as the need for preventive care to start from conception and the crucial importance of maternal mental health are discussed A variety of prominent programmes which have good evidence of efficacy are described These include Targeted approaches with individuals and families Macro policies affecting housing and employment Lifestyle contributions such as diet and exercise However some attempts to achieve preventive benefits have not succeeded and reflecting on these problems is an important feature of this review Jennifer Newton has written extensively on these issues for over twenty years and her careful examination of the research literature provides a succinct overview of the state of current knowledge which will benefit mental health professionals and students of health psychology and public health It also takes a life course perspective and considers how when and why vulnerability persists through childhood into adult life so will interest those whose work focuses on child well being
