Design Recommendations for Intelligent Tutoring Systems: Volume 11 - Professional Career Education Anne Sinatra,Art Graesser,Xiangen Hu,Lisa Townsend,Vasile Rus,2023-09-01 The Design Recommendations for Intelligent Tutoring Systems series has covered many different topics over the past ten years Those topics have ranged from general components of intelligent tutoring systems ITSs Learner Modeling Instructional Management Authoring Tools Domain Modeling to advanced elements Assessment Methods Team Tutoring Self Improving Systems Data Visualization Competency Based Scenario Design Our most recent previous volume included a series of Strengths Weaknesses Opportunities and Threats SWOT Analyses on all the initial topics as well as overviews of ITSs in general and the Generalized Intelligent Framework for Tutoring GIFT software Sottolare et al 2012 Sottolare et al 2017 Goldberg Sinatra 2023 Each book in the Design Recommendations for

Intelligent Tutoring Systems series has been associated with an Expert Workshop on the same topic. These workshops are part of a cooperative agreement W911NF18 2 0039 between US Army Combat Capabilities Development Command DEVCOM Soldier Center and University of Memphis. One of the goals of the expert workshops is to learn more about ITS capabilities that are being developed and how these approaches as well as lessons learned could enhance the GIFT software. GIFT is freely available at <https://www.GIFTtutoring.org>. Invited experts in industry, academia, and government discuss the expert workshop topic, their applicable work, and suggestions for improving GIFT in what is usually a two-day event. Both the University of Memphis and GIFT Teams participate in the workshop, help to guide discussion, and ask questions that will provide insight into current challenges in GIFT. The expert workshop associated with this current book was held virtually in October 2022 and included presentations about both general approaches and specific applications to professional education in ITSs. Additionally, the University of Memphis team that participated in the workshop included Arthur C. Graesser, Xiangen Hu, Vasile Rus, and Jody Cockroft. The US Army DEVCOM Soldier Center team who participated in the workshop included Benjamin Goldberg, Gregory Goodwin, Anne M. Sinatra, Randall Spain, and Lisa N. Townsend. The current volume and the expert workshop that was associated with it branched out in a new direction and rather than addressing specific components of an ITS or types of features, approaches that could be included in ITSs, it focused on how to apply an ITS for specific types of training. The specific focus was on ITSs for Professional Career Education. This topic area was selected as in general, ITS research tends to be focused on K-12 or college education and in many cases on domains such as algebra or physics. However, for the military and for industry trainees, are adult learners and domains tend to be more active, applied, and experiential. This workshop provided an opportunity for discussion of specific examples of applied training that occurs with ITSs as well as discussion of general approaches and considerations for applied professional education in ITSs.

Carillo,2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources **Willing's Press Guide** ,2004 Coverage of publications outside the UK and in non English languages expands steadily until in 1991 it occupies enough of the Guide to require publication in parts **Guide to**
