Artificial Intelligence and Human Existence Akanksha Srivastava,A.V. Senthil Kumar,Disha Maheshwari,Samrat Ray,2025-12-22 Artificial Intelligence AI has become part and parcel of many aspects of our lives impacting how we approach tasks and understand the world around us This book recognizes the impact that Artificial Intelligence AI has on education computer science and society Taking an interdisciplinary approach it looks at the positive and negative implications and delivers a comprehensive understanding of how the integration of AI is shaping the future of human existence This book

covers twelve topics that reveal the links between AI and humans. The topics range from the transformational role of technology in education to the ethical considerations surrounding AI's application plus many more. Specifically, it investigates how AI algorithms are pushing the boundaries of inventions in computer science and driving innovations in human computer interaction and software development through themes such as Computer Science and Technological Frontiers. It also reflects on the societal impact of AI and offers tools to navigate the changing landscape of technology and humanity. With discussions on the latest advancements in AI and their implications for future innovations, readers of this book will learn of the ethical challenges posed by AI through in-depth analysis including coverage of equity, privacy, and algorithmic bias. *Artificial Intelligence and Human Existence: Insights on Education, Technology, and Society* is for researchers, educators, policymakers in the fields of human factors, human computer interaction, and computer science, plus anyone interested in the links between AI and human society.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11. *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings, and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.
