[Leveraging GenAI for Machine Learning Education in Public Health](#) Ricky Leung,2025-12-12

This book explores how ChatGPT as a generative AI Gen AI platform can support education research and skill development in artificial intelligence AI and machine learning ML for public health applications

By bridging the gap between AI technology and public health expertise the book empowers readers to harness AI ML for data driven decision making health interventions and innovative research in the digital age

The rapid advancement of AI and ML is transforming public health research policy and practice

However many public health professionals lack the technical expertise to leverage these tools effectively

This book addresses this gap

It provides a structured approach to integrating ChatGPT into learning environments from higher education to professional training offering accessible explanations hands on exercises and real world applications

The book begins with an introduction to AI and ML in public health

It then examines how ChatGPT can enhance AI ML education through a method known as programming by prompting a technique where users interact with AI models by providing structured prompts to generate modify and refine code

This approach enables learners to write functional code without requiring extensive prior programming knowledge and allows them to work with data relevant to public health

As a pedagogical tool the book provides simulated electronic health record EHR data to facilitate hands on learning of ChatGPT s applications in practice

It also introduces fundamental ML concepts algorithms and models so that learners gain both foundational knowledge and an understanding of their real world applications in public health

The book also explores responsible use of ChatGPT and similar Gen AI tools ethical considerations data privacy and transparency to provide a well rounded perspective on AI s role in public health

[Leveraging GenAI for Machine Learning Education in Public Health](#) is an invaluable resource for public health professionals educators researchers and students interested in developing AI literacy and practical skills

The text also would appeal to healthcare data scientists and analysts medical and health informatics professionals public health policymakers tech and AI enthusiasts in public health executive and continuing education learners multidisciplinary scholars and practitioners
