Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences. While instructional designers are a tremendous asset to higher education, not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations. Drawing on a wealth of research, professional experience, and strategic insights, this book equips new and seasoned teaching faculty and trainers with step-by-step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners. Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials, course design, and learning environments while supporting their digital literacies. Rather than introduce AI as a means of outsourcing subject area expertise, critical thinking, or cognitive processes, the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices. From optimizing course alignment and accessibility practices to fostering active learning, motivation, and engagement, educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license. **Windows 11**

They play a crucial role in helping businesses grow in a multitude of use cases and create applications used by millions worldwide. Designed for coders of all levels, this book bridges the gap between theoretical concepts and real-world applications, empowering you to build

intelligent systems In this book the readers will work with code tackling fundamental topics like ML by grasping core principles through practical coding exercises followed by computer vision where the code is trained to see the world and learn image processing techniques like feature detection empowering applications to analyze and interpret visual data This is followed by natural language processing NLP which enables the software to understand and manipulate language by utilizing techniques like tokenization sentence sequencing and more Additionally this book also talks about sequence modeling whereby readers master techniques like recurrent neural networks RNNs and Long Short Term Memory LSTM networks as well as MLOps for deploying and scaling your AI ML solutions on premise and in the cloud with tools like TensorFlow Extended TFX and Kubeflow By the end of the book readers will learn to build ML models deploy AI on diverse platforms and serve models online and in the cloud ensuring smooth and scalable AI solutions They will be equipped with the knowledge of industry standard tools and best practices

WHAT YOU WILL LEARN Implement ML models with Scikit learn and TensorFlow across various tasks Build NLP applications with text processing embeddings and sequence models Deploy and scale ML models using MLOps TensorFlow Serving and mobile tools Learn to bring innovative changes and solutions to use cases across industries Develop scalable solutions using CNNs object detection and segmentation

WHO THIS BOOK IS FOR This book is for coders and software engineers from novice to experienced aiming to integrate AI and ML to enhance their IT systems While familiarity with core software engineering concepts is beneficial the book assumes only a basic understanding of programming principles making it accessible to a broad range of professionals

TABLE OF CONTENTS 1 Introducing Artificial Intelligence and Machine Learning 2 Machine Learning Fundamentals 3 TensorFlow Essentials 4 Engineering for Machine Learning 5 Machine Learning Algorithms 6 Implementing First ML Models 7 Computer Vision 8 Natural Language Processing 9 Sequence Modelling and Transformers 10 MLOps and Deployment 11 Model Serving and Scalability 12 Model Deployment for Mobile 13 Summary Future and Resources
