Easy Ai Slideshow Maker Ideas For Dads:

The Ultimate Long-Distance Dads Guide Drs. Danny R. Andreas Msc.,2025-05-15 I've lived it myself I wrote this book to share the knowledge I wish I'd known ten years ago before I became a distance dad before the legal battles and before parental alienation began It would have saved me so much time energy sanity and money You can't always be near your child But that doesn't mean you can't still be their dad Read this book if you want to build bonds that distance legal obstacles or parental alienation can't break Own Fatherhood It Matters Today Through research and trial and error I developed strategies across many areas that actually work The close bond my child and I share today despite all the odds is living proof of that My book is filled with practical easy to follow tips you can apply right away It's not rocket science In fact you'll see much of it is just common sense Some of the things you'll learn Parent your child positively and effectively even from afar Build and keep a meaningful bond at each developmental stage Use tech and smart tricks to turn boring video calls into engaging moments Handle legal battles and parental alienation as a divorced or long distance dad Save money on legal fees travel and gifts You don't need permission to be a dad You just need the right knowledge and tools Let this guide help you become the dad your child remembers and respects no matter the circumstances

AI and Ada Mark Seligman,2025-10-07 The book's Preface places the current AI explosion in the context of other technological cataclysms and recounts the author's personal and not always deadly serious AI journey Chapter One Extracting the Essence assesses the potential of machine translation of literature exploiting Vladimir Nabokov's hyperconscious literary art as a reference point Chapter Two Toward an Artificial Nabokov goes on to speculate on possibilities for actual artificial creation of literature Chapter Three Large Literary Models Intelligence and Language in the LLM Era explains recent spectacular progress in Generative Artificial Intelligence GenAI as exemplified by Large Language Models like ChatGPT On the way the chapter ventures to tackle perennial questions What is intelligence What is language and culminates in an assortment of striking demos The volume's Sendoff considers whether machines while now arguably intelligent can ever also gain sufficient sensation and emotion to create language art with other than borrowed depth and while viewing this development as likely all too soon declines to despair on that account
