Designer Exit Scandals dives into the tumultuous world of design exploring the dramatic departures of prominent designers and the ripple effects these exits have on the industry It s not just about firings and resignations the book investigates the complex circumstances that lead to these career disruptions offering a behind the scenes look at the high stakes intersection of talent business and personal lives Consider the pressure of maintaining creative control versus the demands of a business or the impact of fame that can derail a designer s career This book uniquely focuses on the often overlooked exit as a critical moment of analysis rather than solely celebrating success stories Through detailed case studies the book examines the roles of management personal struggles and external pressures in these departures drawing broader conclusions about the nature of the design industry and the need for ethical leadership The book progresses by first establishing a framework for understanding the designer exit then presenting

specific cases and finally synthesizing these cases to offer practical recommendations

The mysterious Instagram algorithm

While we'll never know exactly how Instagram has weighted the various data points that they put into their algorithm we do know that Instagram's back end technology now focuses on relevancy serving up the posts that are most likely to relate to certain users based on their activity on the site So every time a user clicks through a post or spends a certain amount of time looking at a certain influencer Instagram is capturing that data in some way and building it into their engine to ensure that posts that users won't care about are less likely to show up in their feed We do know however that Instagram is looking at the following

Timely content

This is all about recency meaning if a user hasn't logged in for a while they won't have to scroll through outdated and no longer relevant posts They'll be shown timely content that matters to them

Interest

This is really the secret sauce as Instagram is paying attention and will serve content that it believes the user will be interested in

Relationships

Instagram knows what photos users tag and where they comment So if a user has interacted in some way with certain brands in the past they are far more likely to be served content from that brand or similar brands in the future For marketers this is a great thing It means that as Instagram learns more about your brand your posts and advertisements are more likely to get in front of your niche or target audience

A few notes about Instagram Shopping

With the release of Instagram Shopping in late 2016 Instagram literally turned their platform into an online marketplace While it is still a common practice to include website links to your business site and even to a product page now it is possible to allow the customer to transact directly on the Instagram platform For businesses that want to enable the Shopping capability they need to meet the following requirements

- You must have an Instagram business profile
- That business profile needs to be connected to a Facebook catalog
- Your company's registered headquarters location must be located in one of the Instagram approved countries
- Items for sale must be physical goods that comply with the trading guideline and terms of use set forth by Instagram

As this Instagram Marketing Guide is intended as a resource for those getting started with Instagram marketing we will not be providing a deep dive of the Instagram Shopping capability Here is a Preview of What You Will Get
