with a topic in medical anthropology It explores the world of folk medicine in the Caribbean Dominica local beliefs and
practices concerning how the body functions and malfunctions and the home remedies Dominicans use to cure common
illnesses The case study goes beyond discussing the exotic medical system of a developing country which includes sorcery
and folk illnesses to discuss how folk medicine flourishes in industrialized countries in a way that is little different than that
practiced in Dominica The theme is that cultural ideas about the body and uses of medicinal plants are deeply intertwined
Ideas about illness direct the consequent medical response The book s topic is important because knowledge of local
ethnomedical practice is essential for development of public health interventions in non Western settings This realist
ethnography is aimed at any member of the generally educated population
