Generative AI and Education B. Mairéad Pratschke, 2024-08-27

This volume addresses the gap in knowledge around generative AI and its applications in education. It draws on the recent history of technological innovation and digital pedagogies, locating generative AI in the contemporary discourse around education futures. It argues that a new hybrid model of education is emerging, requiring educational institutions to embed generative AI into course and programme design, delivery, and assessment. It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like. Grounded in educational theory, it offers actionable pedagogy-informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education. It offers advice based on evidence-based digital pedagogy, including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice. The book also explores the wider context informing this shift, connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning, learning agility, and future skills that make the case for the integration of competency-based assessment into mainstream education. Finally, going

beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector *AI in Education: A step-by-step Guide for Teachers and Students* Mr. Jawahar Sri Prakash Thiyagarajan, (Neuroscience, UK), Dr. Jeyashree Swaminathan, M.A., M.Ed., MLIS, M.Phil., Ph.D., Dr. Thiyagarajan Sivaprakasam, M.Sc., Ph.D., 2024-10-15 AI in Education A Step by Step Guide for Teachers and Students is an essential resource for educators and students seeking to understand and implement artificial intelligence AI in modern educational settings This book provides a comprehensive exploration of AI concepts including machine learning neural networks and deep learning and their practical applications in the classroom Designed with both teachers and learners in mind the guide covers a wide range of topics Fundamentals of AI An introduction to AI its subfields and real world applications that enhance educational experiences AI Powered Tools Step by step guidance on using AI tools such as generative AI image recognition and personalized learning platforms Ethical Considerations A thoughtful examination of the ethical implications of AI in education focusing on fairness transparency and privacy Hands on Exercises Practical activities and scenario based examples that help educators and students apply AI in teaching and learning environments Future Trends Insights into the future of AI in education from AI driven lesson planning to adaptive learning technologies Whether you're an educator looking to enrich your teaching methods or a student eager to explore AI's potential this book offers the tools techniques and knowledge needed to navigate the evolving landscape of AI in education Teaching Media Literacy with Social Media News Roy S. Whitehurst, 2024-08-30 Featuring tools activities and insightful stories from a CIA analyst and instructor with 30 years of experience this practical and engaging book supports busy educators to teach the lifelong skills of news and media literacy to their students Based on existing curriculum and teaching standards this guidebook shows how social studies and English language arts ELA teachers can build students confidence with social media evaluation skills which are critical to engaging in civic discourse and building a stronger democracy In Part 1 Whitehurst gives an overview of the media evaluation techniques based on those you would learn as a CIA analyst including understanding how our biases and mindset make us vulnerable to disinformation learning how media tries to persuade us checking facts and spotting disinformation Part 2 dives deeper by showing teachers how learners can check if an argument on social media is valid and how fallacies and manipulation tactics in online arguments can complicate this important skill It is illustrated by examples from social media and contemporary popular culture in different mediums including videos photos memes and AI generated content You can also find fresh and updated social media examples on the author's website News Literacy Sleuth Packed with practical classroom resources examples from popular culture and engaging insights into the CIA analyst role this book is designed to support middle and high school teachers with news and

media literacy in social studies civic education and ELA **Critical Literacy in an AI World** Kathy A. Mills, Amanda Gutierrez, 2025-12-18 Critical Literacy in an AI World is an innovative book that uses critical literary perspectives to examine generative AI. It provides thought provoking insights into advancements in artificial intelligence which are increasingly entangled in human decision making across all spheres of society profoundly reshaping literacy and media practices. Mills and Gutierrez analyse how these transformations affect and are affected by the evolving nature of human knowledge, consciousness, creativity, emotion, ethics, and aesthetics. They highlight the importance of critical literacy for understanding and even reclaiming the power dynamics operating in the social construction of the human experience within AI driven texts and technologies. This book encourages readers to critically navigate computational algorithms and agents that mediate digital social practices and daily life. Blending theoretical frameworks and practical applications, it advances students' critical AI based digital reading and authoring skills as well as teachers' capabilities to use critical pedagogies, curricula, and assessment for reflective AI text environments. Critical Literacy in an AI World is essential reading for students and researchers in literacy and educational technology. *The Prospective Teacher's Grasp of High School Content in His Probable Fields of Instruction* Russell E. Jonas, University of Iowa, 1928 **Critical Roles of Digital Citizenship and Digital Ethics** DeHart, Jason D., 2023-10-04 The digital age has brought about significant changes to our society, creating a complex and ever evolving digital landscape. To navigate this landscape effectively, it is crucial to foster a deep understanding of ethics and citizenship in all domains of life. This imperative holds true at every level of education, and it is equally important to explore the historical origins of these concepts. Critical Roles of Digital Citizenship and Digital Ethics delves into the multifaceted realm of digital ethics and citizenship, shedding light on the latest research studies conducted in the educational field as well as insights from the humanities, history, social sciences, sociology, and civics. This comprehensive research handbook provides a platform for in depth discussions and empirical investigations into the philosophical foundations and practical implications of digital citizenship. By examining how digital ethics have been and continue to be shaped, the book offers valuable insights into the ways in which educators and researchers can approach these topics in the realm of education. Designed for researchers in humanities, sociology, and educational fields as well as students seeking a deeper understanding of the historical and contemporary dimensions of digital ethics and digital citizenship, this book offers a rich exploration of their roots and current implications. It explores the historical underpinnings of these concepts, advocates for asset based approaches to digital citizenship, and examines the current educational strategies implemented at both the K-12 and post secondary levels. Additionally, it delves into the theoretical foundations of digital ethics and citizenship, considering the impact of digital landscapes on young learners, adolescents, and adults. The book also presents insightful reports on the latest studies pertaining to digital ethics and digital citizenship. **The Journal of the National Education Association** National Education Association of the United States, 1929 **Linguistics and Language Behavior Abstracts**, 2009-04 *Journal*
