Artificial Intelligence for Education Mario Allegra, Manuel Gentile, Giuseppe Città, Frank Dignum, Iza Marfisi-Schottman, 2023-11-27 What learning teaching and education will be in the next future is an open question Nevertheless believing that an increasing prevalence of AI may not influence the education field seems objectively unlikely In recent years the new renaissance of AI has stimulated discussion on how advances in AI can influence the educational sector and the future educational policies and the impact of AI on Technology Enhanced Learning TEL On the other side the attention of the education sector in artificial intelligence is complemented by the consideration that since the early days of AI researchers have shown for the education sector which has often seen education as one of the preferred application areas The interaction between the AI and TEL research fields led to the investigation of how the advance in AI could support the development of flexible inclusive personalized engaging and effective learning tools Besides research in this area could be a powerful tool to open the learning black box by providing a deeper understanding of how learning occurs The proposed Research Topic aims to gather contributions that provide a comprehensive picture of how AI is changing

educational practices and how the key stakeholders in the educational community i.e. students, teachers, faculty and families perceive this ongoing change. Relevant topics include but are not limited to AI applications in real world educational settings: Intelligent Tutoring Systems, Adaptive learning environments, Learning design and AI, Students profiling, definition of the student model and ethical implications, Intelligent techniques for objective and integrated students evaluation in TEL, Teachers competencies for effective integration of AI into Education, Teachers perceptions of AI prejudices and attitudes, The role of cognitive architectures in Education, Serious games and AI, Social robotics in Education.

Academic Integrity in the Age of Artificial Intelligence Mahmud, Saadia, 2024-02-13. Powerful generative Artificial Intelligence (AI) has defined and transformed our modern era and the fundamental conceptualization of academia stands at a crossroads. Academic Integrity in the Age of Artificial Intelligence delves deep into the seismic shifts and intricate challenges brought forth by the proliferation of AI technologies, exploring the intricacies between innovation and integrity. The rise of generative AI, exemplified by ChatGPT, has set a cascade of change across diverse sectors including higher education, medicine and the arts. This book dissects the multifaceted impact of AI on the academic landscape. With AI's ability to craft text and imagery mirroring human creativity, the lines between authentic scholarship and synthetic deception blur. The book examines the delicate balance between productivity and ethics while weaving a comprehensive tapestry of insights from various stakeholders. From academics grappling with the definition of AI-assisted breaches of academic integrity to policymakers reshaping the future of higher education, this book engages a myriad of voices. It scrutinizes the nascent challenges in assessment design, the urgent need to update antiquated integrity policies and the importance of research ethics in an AI-driven world. This book is ideal for educators, policymakers, students and technologists through the complicated terrain of AI ethics.
