Transforming Scholarly Publishing With Blockchain Technologies and AI Gunter, Darrell Wayne, 2021-06-18 Every industry will be positively affected by blockchain and AI technology at some point However blockchain is a misunderstood technology within the publishing realm The scholarly publishing industry can significantly improve the flow of research drive down costs and introduce new efficiencies in the publishing industry with these new technologies The scholarly publishing industry is in its early days of the digital transformation and blockchain and AI technology could play a major role in this However the industry has been resistant to change These reasons include but are not limited to staying with legacy systems cost of new platforms changing cultures and understanding and adopting new technologies With proper research and information provided the publishing industry can adopt these technologies for beneficial advancements and the generation of a bright future *Transforming Scholarly Publishing With Blockchain Technologies and AI* explores the changing landscape of scholarly publishing and how blockchain technologies and AI are slowly being integrated and used within the industry This book covers both the benefits

and challenges of implementing technology and provides both cases and new developments Topics highlighted include business model developments new efficiencies in scholarly publishing blockchain in research libraries knowledge discovery and blockchain in academic publishing This book is a valuable reference tool for publishers IT specialists technologists publishing vendors researchers academicians and students who are interested in how blockchain technologies and AI are transforming and developing a modern scholarly publishing industry Intelligent Computing and Optimization Pandian Vasant,Vladimir Panchenko,Elias Munapo,Gerhard-Wilhelm Weber,J. Joshua Thomas,Rolly Intan,Mohammad Shamsul Arefin,2024-12-26 This book of Springer Nature is another proof of Springer s outstanding and greatness on the lively interface of Smart Computational Optimization Green Infrastructure Innovative Modeling and Deep Learning Architectures It is a Master Piece of what our community of Academics and Experts can provide when an Interconnected Approach of Joint Mutual and Meta Learning is supported by Holistic Operational Research and Experience of the World Leader Springer Nature The 7th edition of International Conference on Intelligent Computing and Optimization took place at Baitong Hotel Resort on October 26 27 2023 with tremendous support from the global research scholars across the planet Objective was to celebrate Global Research Quality with Compassion and Wisdom with researchers scholars experts and investigators in Intelligent Computing and Optimization across the globe to share knowledge experience and innovation a marvelous opportunity for discourse and mutuality by novel research invention and creativity This proceedings book of the 7th ICO 2023 is published by Springer Nature Creativity Label of Inspiration *Bio A.I. - From Embodied Cognition to Enactive Robotics* Adam Safron,Inês Hipólito,Andy Clark,2023-12-08 Even before the deep learning revolution the landscape of artificial intelligence AI was already changing drastically in the 90s Embodied intelligence it was proposed must play a crucial role in the design of intelligent machines This new wave was inspired by what is today known as Embodied and Enactive Cognitive Science or E Cognition which considers that cognitive activity does not reduce to the intellectual capacities of agents being able to represent their environments E cognition set AI and robotics in a new direction in which intelligent machines are required to interact with the environment and where this interaction does not reduce to explicit representations or prespecified algorithms These ideas revolutionized the way we think about intelligent machines and cognition but these theoretical advances are only partially reflected in modern approaches to AI and machine learning ML Despite deeply impressive achievements AI ML still struggles to recapitulate the kinds of intelligence we find in natural systems whether we are considering individual insects e g simultaneous localization and mapping or swarm behaviour e g forum sensing and ensemble inferences and especially the kinds of flexibility and high level reasoning characteristic of human cognition

Vampire State Ian Williams,2024-09-05 This is the terrifying story of China s vampire economy State capitalism Socialism with Chinese characteristics A socialist market economy There have been numerous descriptions of the Chinese economy However none seems to capture the predatory at times surreal nature of the economy of the world s most populous

nation nor the often bruising and mind bending experience of doing business with the Middle Kingdom Rules and agreements mean little Markets are distorted statistics fabricated foreign industrial secrets and technology systematically stolen Companies and entrepreneurs at home and abroad are bullied often with the collusion of the victims themselves The Party is in every boardroom and lab with businesses thriving or dying at its will All this is part of realising President Xi Jinping's ambition of China becoming the world's pre eminent economic technological and military power One of the Financial Times Best New Books on Economics in 2024 **Great Power Cyber Competition** David V. Goe, Margaret W. Smith, 2024-02-20

This volume conceptualizes the threats challenges opportunities and boundaries of great power cyber competition of the 21st century This book focuses on a key dimension of contemporary great power competition that is often less understood due to its intangible character the competition taking place in the cyber domain including information and cyber operations Democracies across the globe find themselves in an unrelenting competition with peer and near peer competitors with a prevailing notion that no state is safe from the informational contest Adversarial powers particularly China and Russia recognize that most competition is principally non kinetic but dominates the information environment and cyberspace and the volume articulates the Russian and Chinese strategies to elevate cyber and information competition to a central position Western governments and in particular the U S government have long conceived of a war peace duality but that perspective is giving way to a more nuanced perception of competition This volume goes beyond analyzing the problems prevalent in the information space and offers a roadmap for Western powers to compete in and protect the global information environment from malicious actors Its genesis is rooted in the proposition that it is time for the West to push back against aggression and that it needs a relevant framework and tools to do so The book demonstrates that Western democratic states currently lack both the strategic and intellectual acumen to compete and win in the information and cyber domains and argues that the West needs a strategy to compete with near peer powers in information and cyber warfare This book will be of much interest to students of cyber warfare information warfare defense studies and international relations in general as well as practitioners **Resources in Education** ,1984 **How To Make Money With AI Content Creation** Sean
