Increase sales and lead generation with AI and chatbots Krzysztof Wroblewski,2023-07-10 To grow your ecommerce business you need to gain more clients And to achieve it you have to provide high quality customer experience Sounds logical But the more visitors on your website the more questions your support agents have to handle And here is the challenge you need to face to successfully grow your store How to serve more clients answer more questions and maintain the highquality of support at the same time There are two ways The first is to constantly hire new support agents It probably

will work but the cost you'll have to take for constantly recruiting and training new employees will be huge. The second way is connected to technology that took the ecommerce industry and not only this one by a storm and will stay with us for a long time. If not forever. The AI

The Publishers Weekly, 2003 **AI Agents vs. AI Chatbots: A Strategic Guide for B2B Customer Service** Branislav Bozanic, 2025-04-01

In 2021, Uber was expanding at a staggering rate, but growth came at a cost. After pandemic-related restrictions eased, the multinational American transportation company faced severe driver shortages and regulatory hurdles that slowed the hiring of new drivers. Wait times surged, prices fluctuated, and customer frustration grew. One of the biggest bottlenecks was due to customer support. The high volume of tickets coming in across multiple channels required manual processing. And therein lay their problem. Even Uber couldn't keep up with all the customer support demands. This resulted in slow response times, inconsistent resolutions, and high operational costs. However, their team didn't panic. There was an obvious solution: AI-driven technologies. More precisely, an AI-powered robotic process automation (RPA) system. Uber quickly implemented RPA to categorize tickets and handle repetitive and time-consuming customer support tasks. The results? Processing time for common issues dropped from days to minutes. Customer satisfaction skyrocketed with faster response times. Cost savings were massive, with the company's revenue growing from 17 to 32 billion US dollars the following year.

1. Thanks to chatbots, and now AI agents automating customer service is getting easier, cheaper, and more scalable. These digital assistants can answer customer questions and automate simple tasks based on a specific set of data. But only one of them can also make dynamic decisions, plan actions, and even learn from experiences, offering unparalleled service.

Curious to know which one is the all-around solution that is more suitable for the B2B ecosystem? This ebook aims to demystify the differences between AI Agents and AI Chatbots, provide their respective benefits, and help businesses make the right choice according to their unique customer service requirements.

[Improve customer experience with chatbots](#) Beata Stefanowicz, 2023-02-13

We have come a long way in the past 70 years since chatting to a computer was first mentioned. A chatbot is a computer program that communicates with human users over text or through a speech-to-text system. Businesses can use chatbots to communicate with their customers and recreate the in-store shopping experience online. Ecommerce companies can do this by:

- Welcoming visitors to their online store
- Offering support within arm's reach
- Showing personalized deals
- Using proactive sales techniques
- Helping customers find the right products
- Upselling items and services
- Handling complaints on auto-pilot
- Offering membership cards
- Collecting feedback from shoppers
- Offering multilingual support

Many ecommerce brands are already taking advantage of chatbots to get ahead of their competitors. Why not try them for yourself and see what this technology can do for your business?

Empowering Organizations with Power Virtual Agents Nicolae Tarla, 2021-08-13

Unleash the capabilities of Power Virtual Agents to provide actionable insights to your customers and employees using automated chatbot solutions.

Key Features:

- Provide instant customer support on your webpages using Power Virtual Agents
- Discover tips and techniques for the governance, administration, and deployment of

chatbots Build conversational solutions for your web apps public portals and Teams environment

Book Description Power Virtual Agents is a set of technologies released under the Power Platform umbrella by Microsoft. It allows non-developers to create solutions to automate customer interactions and provide services using a conversational interface, thus relieving the pressure on front-line staff providing this kind of support. Empowering Organizations with Power Virtual Agents is a guide to building chatbots that can be deployed to handle front desk services without having to write code. The book takes a scenario-based approach to implementing bot services and automation to serve employees in the organization and external customers. You will uncover the features available in Power Virtual Agents for creating bots that can be integrated into an organization's public site as well as specific web pages. Next, you will understand how to build bots and integrate them within the Teams environment for internal users. As you progress, you will explore complete examples for implementing automated agents/bots that can be deployed on sites for interacting with external customers. By the end of this Power Virtual Agents chatbot book, you will have implemented several scenarios to serve external client requests for information, created scenarios to help internal users retrieve relevant information, and processed these in an automated conversational manner. What you will learn: Get to grips with Power Virtual Agents and understand the license requirement for using it. Deploy bots on public websites or web pages. Create conversational solutions for your organization using Microsoft Teams. Explore best practices for governance that are essential for implementing Power Virtual Agents. Explore different business scenarios for implementing Power Virtual Agents. Understand the integration between Power Virtual Agents and Microsoft Power Platform. Who this book is for: This book is for organization representatives looking to automate processes, relieve the first contact workload of their front-line agents, and provide actionable results to employees and customers. Business professionals, citizen developers, and functional consultants will also find this book helpful. Familiarity with the Modern Workplace and the Dynamics 365 family of products will be useful. Beginner-level knowledge of Power Platform and its main modules will assist with understanding the concepts covered in the book more effectively.
