Voicing Responsible AI Pedagogy for Music and Visual Arts Education Lauri Väkevä,2025-03-29 This book

critically examines the integration of generative artificial intelligence Gen AI in music education exploring its transformative potential and associated risks It underscores the necessity for innovative AI pedagogies across music and the arts offering educators researchers and policymakers valuable insights for incorporating Gen AI into teaching while mitigating its hazards By adopting a balanced critical perspective the book aims to promote a dynamic inclusive and responsible educational approach that is responsive to the rapid advancements in adaptive technology The book s argumentation is grounded in synthesizing Deweyan pragmatist and Baradian posthumanist philosophical perspectives These perspectives collectively provide a framework for addressing the deployment of Gen AI in music education within a broader ethical context of global sustainability The book is also informed by the author s many years as a scholar of music education

Superbloom

Nicholas Carr,2025-01-28 This book might finally convince you to stay off social media or at least get the apps off your phone Brianne Kane Scientific American A Financial Times Best Summer Book of 2025 in Technology From the author of The Shallows a bracing exploration of how social media has warped our sense of self and society From the telegraph and telephone in the 1800s to the internet and social media in our own day the public has welcomed new communication systems Whenever people gain more power to share information the assumption goes society prospers Superbloom tells a startlingly different story As communication becomes more mechanized and efficient it breeds confusion more than understanding strife more than harmony Media technologies all too often bring out the worst in us A celebrated commentator on the human consequences of technology Nicholas Carr reorients the conversation around modern communication challenging some of our most cherished beliefs about self expression free speech and media democratization He reveals how messaging apps strip nuance from conversation how digital crowding erodes empathy and triggers aggression how online political debates narrow our minds and distort our perceptions and how advances in AI are further blurring the already hazy line between fantasy and reality Even as Carr shows how tech companies and their tools of connection have failed us he forces us to confront inconvenient truths about our own nature The human psyche it turns out is profoundly ill suited to the superbloom of information that technology has unleashed With rich psychological insights and vivid examples drawn from history and science Superbloom provides both a panoramic view of how media shapes society and an intimate examination of the fate of the self in a time of radical dislocation It may be too late to change the system Carr counsels but it s not too late to change ourselves
