The Starving Artist Myth Mark J. Jones, 2024-08-20 Creative sector jobs are driving our economy and offer a viable career path for today's youth. Careers and business opportunities in creative industries offer flexibility, variety, and security. Why then do people hesitate to go into them? A belief in the myth of the starving artist, which conjures images of penniless writers and artistic bohemians, is to blame. The myth leads many away from choosing a path they would love in favour of more traditional fields. Years later, they may come to regret that choice. Mark J. Jones shows that the persistent stereotype of the starving artist is not just costing youth and working-aged people the opportunity to explore satisfying careers; it could also cost Canada's economy in lost opportunities. Through education and entrepreneurial strategy, artists, musicians, writers, media makers, designers, actors, and others can come to understand how to reach audiences and customers in a global market. In *The Starving Artist Myth*, Jones erases any remaining doubt about the opportunities in the creative economy by getting at the origin of the starving artist stereotype, demonstrating the economic resiliency of the sector and delving into the strategies for achieving career success. *Principles of Strategic Communication* Derina Holtzhausen, Jami Fullerton, Bobbi Kay

The Line James Boyle, 2024-10-22 How AI will challenge our ideas about personhood. Chatbots like ChatGPT have challenged human exceptionalism; we are no longer the only beings capable of generating language and ideas fluently. But is ChatGPT conscious? Or is it merely engaging in sophisticated mimicry? And what happens in the future if the claims to consciousness are more credible? In *The Line*, James Boyle explores what these changes might do to our concept of personhood: to the line we believe separates our species from the rest of the world, but that also separates persons with legal rights from objects. The personhood wars over the rights of corporations and animals over the question of when life begins.

and ends have always been contentious We've even denied the personhood of members of our own species How will those old fights affect the new ones and vice versa Boyle pursues these questions across a dizzying array of fields He discusses moral philosophy and science fiction transgenic species nonhuman animals the surprising history of corporate personality and AI itself Engaging with empathy and anthropomorphism courtroom battles on behalf of chimps and doom laden projections about the threat of AI The Line offers fascinating and thoughtful answers to questions about our future that will arrive sooner than we think
