*The De Gruyter Handbook of Automated Futures* Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can

automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation

**Genius Makers**  
Cade Metz, 2021-03-16 This colorful page turner puts artificial intelligence into a human perspective Through the lives of Geoff Hinton and other major players Metz explains this transformative technology and makes the quest thrilling Walter Isaacson author of The Code Breaker Recipient of starred reviews in both Kirkus and Library Journal THE UNTOLD TECH STORY OF OUR TIME What does it mean to be smart To be human What do we really want from life and the intelligence we have or might create With deep and exclusive reporting across hundreds of interviews New York Times Silicon Valley journalist Cade Metz brings you into the rooms where these questions are being answered Where an extraordinarily powerful new artificial intelligence has been built into our biggest companies our social discourse and our daily lives with few of us even noticing Long dismissed as a technology of the distant future artificial intelligence was a project consigned to the fringes of the scientific community Then two researchers changed everything One was a sixty four year old computer science professor who didn't drive and didn't fly because he could no longer sit down but still made his way across North America for the moment that would define a new age of technology The other was a thirty six year old neuroscientist and chess prodigy who laid claim to being the greatest game player of all time before vowing to build a machine that could do anything the human brain could do They took two very different paths to that lofty goal and they disagreed on how quickly it would arrive But both were soon drawn into the heart of the tech industry Their ideas drove a new kind of arms race spanning Google Microsoft Facebook and OpenAI a new lab founded by Silicon Valley kingpin Elon Musk But some believed that China would beat them all to the finish line Genius Makers dramatically presents the fierce conflict among national interests shareholder value the pursuit of scientific knowledge and the very human concerns about privacy security bias and prejudice Like a great Victorian novel this world of eccentric brilliant often unimaginably yet suddenly wealthy characters draws you into the most profound moral questions we can ask And like a great mystery it presents the story and facts that lead to a core vital question How far will we let it go

Hybrid Images and the Vanishing Point of Digital Visual Effects Tom Livingstone, 2024-07-04

Tackling digital effects such as colourisation time ramping compositing and photo realistic rendering this monograph explores how the growing use of these post photographic procedures shapes our relationship with the image and the world that the image represents At stake is the ability to critically engage with the digital techniques that mediate perceptions of reality Through a series of case studies the book connects the dominant techniques of hybridisation with emergent ways of being in our increasingly hybrid physical digital world Pointing at the relationship between mainstream visual culture and the manifold imperatives of digital technology and digital culture Hybrid Images and the Vanishing Point of Digital Visual Effects highlights how a handful of digital visual effects are coming to shape the way we live Computers and Society Ronald M.
