Obsolete to Optimal: How AI can transform aging U.S. enterprise systems in Insurance and Retail 2025

AUTHOR:1 - Pratyosh Desaraju, AUTHOR:2 - Dr Rohit Kumar Sachan, PREFACE

In an era defined by rapid technological change and increasing customer expectations many of the enterprise systems that underpin the U.S. insurance and retail sectors find themselves at a crossroads

Built decades ago to handle today's challenges these legacy platforms struggle under the weight of ever growing data volumes complex regulatory demands and the onslaught of digitally savvy consumers

Yet within these very constraints lies extraordinary opportunity the chance to transform the obsolete into the optimal by harnessing the power of artificial intelligence

Obsolete to Optimal was born from conversations with technology leaders data scientists and operations executives who shared a common refrain We know AI can help but where do we start and how do we avoid the pitfalls

This book seeks to answer those questions by weaving together strategic insight practical guidance and real world examples

Our goal is twofold first to demystify the process of embedding AI within aging

infrastructures and second to show how this integration not only solves immediate operational challenges but also lays the groundwork for sustainable future proof growth Throughout these pages you will find a progression that mirrors the journey every organization must undertake We begin by establishing why data modernization is not merely an IT upgrade but a business imperative From there we delve into the human element empowering employees to work alongside AI embracing new roles and cultivating a culture of continuous learning Sector specific chapters then illuminate how AI can revolutionize core functions from underwriting and claiming processing in insurance to inventory management and personalized marketing in retail No transformation is without its challenges We confront head on the technical hurdles of integrating AI with brittle legacy systems the organizational resistance that accompanies any major change and the ethical considerations that arise when machines make decisions that affect real people By offering frameworks for governance bias mitigation and transparent decision making we aim to equip leaders not only to deploy AI effectively but to do so responsibly Finally as we look toward 2030 we paint a vision of industries that have shed their outdated pasts and embraced an AI powered future one characterized by agility resilience and customer centric innovation Whether you are a C suite executive charting a digital strategy a technology professional tasked with implementation or an academic seeking to understand the practical contours of AI adoption this book is your guide It is my hope that by the final chapter you will see legacy systems not as obstacles but as ripe opportunities platforms ready to be upgraded enhanced and reinvigorated by intelligent automation May Obsolete to Optimal inspire you to embark on that transformation journey and may you find the insights here both actionable and enduring Authors Pratyosh Desraj Dr Rohit Kumar Sachan [AI-Assisted Programming for Web and Machine Learning](#) Christoffer Noring, Anjali Jain, Marina Fernandez, Ayşe Mutlu, Ajit Jaokar, 2024-08-30 Speed up your development processes and improve your productivity by writing practical and relevant prompts to build web applications and Machine Learning ML models Purchase of the print or Kindle book includes a free PDF copy Key Features Utilize prompts to enhance frontend and backend web development Develop prompt strategies to build robust machine learning models Use GitHub Copilot for data exploration maintaining existing code bases and augmenting ML models into web applications Book Description AI Assisted Programming for Web and Machine Learning shows you how to build applications and machine learning models and automate repetitive tasks Part 1 focuses on coding from building a user interface to the backend You ll use prompts to create the appearance of an app using HTML styling with CSS adding behavior with JavaScript and working with multiple viewports Next you ll build a web API with Python and Flask and refactor the code to improve code readability Part 1 ends with using GitHub Copilot to improve the maintainability and performance of existing code Part 2 provides a prompting toolkit for data science from data checking inspecting data and creating distribution graphs and correlation matrices to building and optimizing a neural network You ll use different prompt strategies for data preprocessing feature engineering model selection training hyperparameter optimization and model evaluation for various machine learning models and use cases The
