chief medical correspondent CNN Physician and former FDA commissioner Scott Gottlieb asks Has America s COVID 19
catastrophe taught us anything In Uncontrolled Spread he shows how the coronavirus and its variants were able to trounce
America s pandemic preparations and he outlines the steps that must be taken to protect against the next outbreak As the
pandemic unfolded Gottlieb was in regular contact with all the key players in Congress the Trump administration and the
drug and diagnostic industries He provides an inside account of how level after level of American government crumbled as
the COVID 19 crisis advanced A system wide failure across government institutions left the nation blind to the threat and
unable to mount an effective response We d prepared for the wrong virus We failed to identify the contagion early enough
and became overly reliant on costly and sometimes divisive tactics that couldn t fully slow the spread We never considered
asymptomatic transmission and we assumed people would follow public health guidance Key bureaucracies like the CDC
were hidebound and outmatched Weak political leadership aggravated these woes We didn t view a public health disaster as
a threat to our national security Many of the woes sprung from the CDC which has very little real time reporting capability to
inform us of Covid s twists and turns or assess our defenses The agency lacked an operational capacity and mindset to
mobilize the kind of national response that was needed To guard against future pandemic risks we must remake the CDC and
properly equip it to better confront crises We must also get our intelligence services more engaged in the global public
health mission to gather information and uncover emerging risks before they hit our shores so we can head them off For this
role our clandestine agencies have tools and capabilities that the CDC lacks Uncontrolled Spread argues we must fix our
