The Almighty Machine Pekka Vahvanen, 2022-02-25
The hymn of Digitalization is nothing new. We must encourage the creation of new apps. We must develop AI in order to prevail among international competition. Technology's advance will halt climate change and let robots do the dumb stuff for us. Our faith in technology is powerful because it has saved us in the past. The Almighty Machine shows us technology's flip side. The things that once powered us toward a brighter tomorrow are already undermining our quality of life. The data stream has shattered our concentration; human relationships have been reduced to a menu of emojis; constant surveillance has nullified much of our privacy; and the development of AI could be the beginning of the end for us. We are becoming the casualties of our own success. Pekka Vahvanen's bristling and timely critique, deftly translated by Mark Jones, throws doubt on the necessity of technological development in a world saturated in tech. The Almighty Machine presents an important question: Does progress no longer make us happier?

The Politics of Combating Human Trafficking in the United States Nancy E. Marion, Kimberly J. Hufgard, 2025-03-04
This book examines political responses to the problem of human trafficking, including proposals, actions, legislative and executive statements made by politicians, government agencies, and civil society organizations to solve or mitigate the crime of human trafficking. The objective is not just to recognize the nature and impact of human trafficking but to understand the approaches used or recommended to solve the problem and the motivations behind such strategies. The issue of human trafficking has become particularly important given the charged environment regarding border politics. The book details the various policy options that have been proposed, supported, opposed, or passed by US politicians over the past five to ten years. This includes decisions made by presidents, legislators, national and state agencies, and interest groups. Court decisions on human trafficking policies and media coverage of events are also explored. This political analysis is designed to help readers understand what motivated the proposals designed to address human trafficking and the impact those policies had or are having. This book is ideal as a primary text for college courses in human trafficking and modern slavery or a supplemental text for a range of scholarly courses of study including human rights, criminal justice law, and political science. It is recommended for anyone with an interest in human trafficking and what might be done to stop it.
