Obsolete to Optimal: How AI can transform aging U.S. enterprise systems in Insurance and Retail 2025 AUTHOR:1 - Pratyosh Desraj, AUTHOR:2 - Dr Rohit Kumar Sachan, PREFACE In an era defined by rapid technological change and increasing customer expectations many of the enterprise systems that underpin the U S insurance and retail sectors find themselves at a crossroads Built decades ago to handle today's challenges these legacy platforms struggle under the weight of ever growing data volumes complex regulatory demands and the onslaught of digitally savvy consumers Yet within these very constraints lies extraordinary opportunity the chance to transform the obsolete into the optimal by harnessing the power of artificial intelligence Obsolete to Optimal was born from conversations with technology leaders data scientists and operations executives who shared a common refrain We know AI can help but where do we start and how do we avoid the pitfalls This book seeks to answer those questions by weaving together strategic insight practical guidance and real world examples Our goal is twofold first to demystify the process of embedding AI within aging infrastructures and second to show how this integration not only solves immediate operational challenges but also lays the groundwork for sustainable future proof growth Throughout these pages you will find a progression that mirrors the journey every organization must undertake We begin by establishing why data modernization is not merely an IT upgrade but a business imperative From there we delve into the human element empowering employees to work alongside AI embracing new roles and cultivating a culture of continuous learning Sector specific chapters then illuminate how AI can revolutionize core functions from underwriting and claims processing in insurance to inventory management and personalized marketing in retail No transformation is without its challenges We confront head on the technical hurdles of integrating AI with brittle legacy systems the organizational resistance that accompanies any major change and the ethical considerations that arise when machines make decisions that affect real people By offering frameworks for governance bias mitigation and transparent decision making we aim to equip leaders not only to deploy AI effectively but to do so responsibly Finally as we

look toward 2030 we paint a vision of industries that have shed their outdated pasts and embraced an AI powered future one characterized by agility resilience and customer centric innovation Whether you are a C suite executive charting a digital strategy a technology professional tasked with implementation or an academic seeking to understand the practical contours of AI adoption this book is your guide It is my hope that by the final chapter you will see legacy systems not as obstacles but as ripe opportunities platforms ready to be upgraded enhanced and reinvigorated by intelligent automation May Obsolete to Optimal inspire you to embark on that transformation journey and may you find the insights here both actionable and enduring Authors Pratyosh Desaraju Dr Rohit Kumar Sachan AI and Humanity Illah Reza Nourbakhsh, Jennifer Keating, 2020-03-10 An examination of the implications for society of rapidly advancing artificial intelligence systems combining a humanities perspective with technical analysis includes exercises and discussion questions AI and Humanity provides an analytical framing and a common language for understanding the effects of technological advances in artificial intelligence on society Coauthored by a computer scientist and a scholar of literature and cultural studies it is unique in combining a humanities perspective with technical analysis using the tools of literary explication to examine the societal impact of AI systems It explores the historical development of these technologies moving from the apparently benign Roomba to the considerably more sinister semi autonomous weapon system Harpy The book is driven by an exploration of the cultural and etymological roots of a series of keywords relevant to both AI and society Works examined range from Narrative of the Life of Frederick Douglass given a close reading for its themes of literacy and agency to Simon Head's critique of the effects of surveillance and automation on the Amazon labor force in Mindless Originally developed as a textbook for an interdisciplinary humanities science course at Carnegie Mellon AI Humanity offers discussion questions exercises including journal writing and concept mapping and reading lists A companion website provides updated resources and a portal to a video archive of interviews with AI scientists sociologists literary theorists and others Artificial Intelligence in the Cultural and Creative Sectors Marta Massi, Marek Prokúpek, Alessandra Ricci, Maria Carmela Ostilio, 2025-11-13 This book explores how AI is redefining the creative and cultural sectors reshaping how content is produced distributed experienced and managed Spanning areas such as publishing heritage music performance and design the book offers the first comprehensive interdisciplinary examination of AI's impact across these diverse sectors as technologies become increasingly embedded in both creative and operational processes **The Fourth Intelligence Revolution** Anthony Vinci, 2025-10-28 A former senior intelligence officer reveals how espionage is being transformed by a new global intelligence race driven by AI and competition with China and how this impacts all of our lives The new global intelligence competition has brought espionage into our workplaces and our living rooms Adversaries like China Iran and Russia have realized that the human element is the weakest link in our industrial and political infrastructure As a result they target all of us stealing our financial data and medical records eavesdropping on our conversations and using platforms like TikTok and Hollywood movies to

influence our opinions The Fourth Intelligence Revolution reveals how the undercover adventures of World War II the spy versus spy confrontations of the Cold War and the find fix and finish counterterrorism missions after 9 11 have given way to the most dangerous period of espionage yet This eye opening account exposes how intelligence now permeates every corner of society from economic espionage and genetic data gathering to information operations targeting children through AI chatbots even extending to reconnaissance on the far side of the moon Both a warning and a call to action The Fourth Intelligence Revolution suggests that we are all in essence becoming intelligence officers and that citizens have both the power and responsibility to reclaim intelligence to safeguard and strengthen our democracy **AIgantic - work smart(er)**
