AI for Everyday People, 2025-09-07 Curious about Artificial Intelligence but not sure where to begin Feeling like everyone is talking about AI while you re still on the sidelines You re not alone Whether you re a professional in your 40 s wondering how AI might impact your career or a student from a smaller city eager to stay ahead in a fast changing world this book is your friendly first step into the world of AI In AI for Everyday People you ll discover a What AI really is explained in plain jargon free language b How AI is already part of your daily life even if you haven t noticed c Practical ways to use AI right now from boosting productivity at work to studying smarter writing emails faster organizing tasks and even creating blogs or social media posts d Step by step guidance to go from complete beginner to confident user e Real life stories of how everyday people just like you are using AI to make life easier This is not a book for tech experts It s for everyday people professionals students small business owners anyone who wants to understand and use AI without feeling overwhelmed By the end of this book you ll have the clarity confidence and skills to make AI work for you whether in your job your studies or your daily life The AI revolution is just beginning With this book you won t just catch up you ll thrive The Promise of This Book By the time you finish reading you ll move from Confusion feeling left out of the AI conversation Confidence knowing how to use AI in your work studies and personal life You ll learn what AI really is and isn t discover simple ways to make it your assistant and build the habits that will keep you future ready without overwhelm This isn t a book for tech experts It s for everyday people professionals in their 40s who think they are left behind students who want to start with AI small business owners startups an aspiring founder parents to help their kids in study etc and anyone curious about how AI can help them A Gentle Invitation Think of this book as your first step into a bigger world Together we ll take AI out of the headlines and put it into your hands as a tool you can trust use and grow with So let s begin The AI era isn t something to fear It s something to embrace And you re right on time Judges, Technology and Artificial Intelligence Tania Sourdin, 2021-05-28 New and emerging technologies are reshaping justice systems and transforming the role of judges The impacts vary according to how structural reforms take place and how courts adapt case management processes online dispute resolution systems and justice apps Significant shifts are also occurring with the development of more sophisticated forms of Artificial Intelligence that can support judicial work or even replace judges These developments together with shifts towards online court processes are explored in Judges Technology and Artificial Intelligence The Radical Case for Teaching Skim Reading in First-Year Writing Ellen C. Carillo, 2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their

classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources

*Building LLMs with PyTorch* Anand Trivedi ,2025-03-13 DESCRIPTION PyTorch has become the go to framework for building cutting edge large language models LLMs enabling developers to harness the power of deep learning for natural language processing This book serves as your practical guide to navigating the intricacies of PyTorch empowering you to create your own LLMs from the ground up You will begin by mastering PyTorch fundamentals including tensors autograd and model creation before diving into core neural network concepts like gradients loss functions and backpropagation Progressing through regression and image classification with convolutional neural networks you will then explore advanced image processing through object detection and segmentation The book seamlessly transitions into NLP covering RNNs LSTMs and attention mechanisms culminating in the construction of Transformer based LLMs including a practical mini GPT project You will also get a strong understanding of generative models like VAEs and GANs By the end of this book you will possess the technical proficiency to build train and deploy sophisticated LLMs using PyTorch equipping you to contribute to the rapidly evolving landscape of AI

WHAT YOU WILL LEARN Build and train PyTorch models for linear and logistic regression Configure PyTorch environments and utilize GPU acceleration with CUDA Construct CNNs for image classification and apply transfer learning techniques Master PyTorch tensors autograd and build fundamental neural networks Utilize SSD and YOLO for object detection and perform image segmentation Develop RNNs and LSTMs for sequence modeling and text generation Implement attention mechanisms and build Transformer based language models Create generative models using VAEs and GANs for diverse applications Build and deploy your own mini GPT language model applying the acquired skills

**Who Wrote This?** Naomi S. Baron, 2023-09-12 Would you read this book if a computer wrote it Would you even know And why would it matter Today's eerily impressive artificial intelligence writing tools present us with a crucial challenge As writers do we unthinkingly adopt AI's time saving advantages or do we stop to weigh what we gain and lose when heeding its siren call To understand how AI is redefining what it means to write and think linguist and educator Naomi S. Baron leads us on a journey connecting the dots between human literacy and today's technology From nineteenth century lessons in composition to mathematician Alan Turing's work creating a machine for deciphering war time messages to contemporary engines like ChatGPT Baron gives readers a spirited overview of the emergence of both literacy and AI and a glimpse of their possible future As the technology becomes increasingly sophisticated and fluent it's tempting to take the easy way out and let AI do the work for us Baron cautions that such efficiency isn't always in our interest As AI plies us with suggestions or full blown text we risk losing not just our technical skills but the power of writing as a springboard for personal reflection and unique expression Funny informed and conversational **Who Wrote This** urges us as individuals and as communities to make conscious choices about the extent to which we collaborate with AI The technology is here to stay Baron shows us how to work with AI and how to spot where it risks diminishing the valuable cognitive and social benefits of being literate
