A Brief History of Artificial Intelligence Michael Wooldridge, 2025-09-23 From Oxford's leading AI researcher comes a fun and accessible tour through the history and future of one of the most cutting edge and misunderstood fields in science Artificial Intelligence The somewhat ill defined long term aim of AI is to build machines that are conscious self aware and sentient machines capable of the kind of intelligent autonomous action that currently only people are capable of As an AI researcher with 25 years of experience professor Mike Wooldridge has learned to be obsessively cautious about such claims while still promoting an

intense optimism about the future of the field There have been genuine scientific breakthroughs that have made AI systems possible in the past decade that the founders of the field would have hailed as miraculous Driverless cars and automated translation tools are just two examples of AI technologies that have become a practical everyday reality in the past few years and which will have a huge impact on our world While the dream of conscious machines remains Professor Wooldridge believes a distant prospect the floodgates for AI have opened Wooldridge s *A Brief History of Artificial Intelligence* is an exciting romp through the history of this groundbreaking field a one stop shop for AI s past present and world changing future

A Teacher's Guide to Conversational AI David A. Joyner,2024-05-27 *A Teacher s Guide to Conversational AI* explores the practical role that language based artificial intelligence tools play in classroom teaching learning experiences and student assessment Today s educators are well aware that conversational and generative AI chatbots intelligent tutoring systems large language models and more represent a complex new factor in teaching and learning This introductory primer offers comprehensive novice friendly guidance into the challenges and opportunities of incorporating AI into K 12 schools and college classes in ways that are appropriate nourishing to students and outcomes driven Opening with an informative overview of the foundational properties key terminology and ethical considerations of these tools the book offers a coherent and realistic vision of classrooms that are enhanced rather than stymied by AI systems This includes strategies for designing assessments that are conducive to students beneficial use of AI while mitigating overreliance or dishonesty using AI to generate lesson examples for student critique or custom content that reinforces course principles leveraging chatbots as a co instructor or a tutor a guide during student driven learning a virtual debate or brainstorming partner and a design project and creating course content lesson plans and activities expanded language and accessibility options and beyond Through the depth of understanding and applied approach provided in these chapters teachers and leaders in training and in service alongside private tutors college instructors and other educators will be better prepared to future proof their efforts to serve new generations of learners

The Fourth Intelligence Revolution Anthony Vinci,2025-10-28 A former senior intelligence officer reveals how espionage is being transformed by a new global intelligence race driven by AI and competition with China and how this impacts all of our lives The new global intelligence competition has brought espionage into our workplaces and our living rooms Adversaries like China Iran and Russia have realized that the human element is the weakest link in our industrial and political infrastructure As a result they target all of

us stealing our financial data and medical records eavesdropping on our conversations and using platforms like TikTok and Hollywood movies to influence our opinions The Fourth Intelligence Revolution reveals how the undercover adventures of World War II the spy versus spy confrontations of the Cold War and the find fix and finish counterterrorism missions after 9 11 have given way to the most dangerous period of espionage yet This eye opening account exposes how intelligence now permeates every corner of society from economic espionage and genetic data gathering to information operations targeting children through AI chatbots even extending to reconnaissance on the far side of the moon Both a warning and a call to action The Fourth Intelligence Revolution suggests that we are all in essence becoming intelligence officers and that citizens have both the power and responsibility to reclaim intelligence to safeguard and strengthen our democracy **The**
