Recipe for a Livable Planet William Sutton, Alexander Lotsch, Ashesh Prasann, 2024-10-16 The global agrifood system has been largely overlooked in the fight against climate change Yet greenhouse gas emissions from the agrifood system are so big that they alone could cause the world to miss the goal of keeping global average temperatures from rising above 1.5 centigrade compared to preindustrial levels Greenhouse gas emissions from agrifood must be cut to net zero by 2050 to achieve this goal Recipe for a Livable Planet Achieving Net

Zero Emissions in the Agrifood System offers the first comprehensive global strategic framework to mitigate the agrifood system's contributions to climate change detailing affordable and readily available measures that can cut nearly a third of the world's planet heating emissions while ensuring global food security. These actions which are urgently needed offer three additional benefits: improving food supply reliability, strengthening the global food system's resilience to climate change and safeguarding vulnerable populations. This practical guide outlines global actions and specific steps that countries at all income levels can take starting now, focusing on six key areas: investments, incentives, information, innovation, institutions, and inclusion. Calling for collaboration among governments, businesses, citizens, and international organizations, it maps a pathway to making agrifood a significant contributor to addressing climate change and healing the planet. *Integrating*

Micro-Credentials With AI in Open Education Durak, Gürhan, Çankaya, Serkan, 2024-11-15. Micro credentials which offer smaller certifications for specific skills and competencies are becoming relevant in today's job market. When combined with artificial intelligence, these credentials can be personalized and tailored to individual learners, assessing their strengths and areas for improvement. AI can also facilitate the creation and management of these micro credential programs, ensuring they meet industry demands and educational standards. Further exploration into this area may help enhance learner engagement while providing a flexible, accessible pathway for individual skill development. *Integrating Micro Credentials With AI in Open Education* provides current insights into the rapidly evolving field of micro credentials with a particular focus on emerging technologies, processes, and applications. It offers an extensive exploration of micro credentials from various perspectives, including their design, development, application in different educational and professional contexts, and integration with cutting edge technologies like AI and MOOCs. This book covers topics such as distance learning, higher education, and learning analytics, and is a useful resource for computer engineers, education professionals, curriculum designers, scientists, academicians, and researchers. **Content Repurposing Made Easy** Rebecca Livermore, 2014-07-01.
