Non-Bullshit Innovation David Rowan, 2019-05-16 updated with new material Digital transformation and disruptive innovation used to be empty buzzwords serving to justify pointless box ticking and absurd corporate posturing And then a global pandemic suddenly forced every kind of organization to embrace genuine urgent innovation as a matter of survival But how can we ensure that the non bullshit version of innovation delivers economic recovery at this crucial moment Are there strategies we can all adapt from the world s most creative leaders to innovate effectively in our own lives David Rowan founding editor in chief of WIRED UK embarked on a twenty country quest to find out Packed full of tips for anyone looking for radical ways to adapt and thrive in the digital age this carefully curated selection of stories will prepare you for whatever the future may bring because the world will never move this slowly again _____ In this remarkable book David Rowan tells a story of transformation how an organisation has found a new way of doing things through innovation driven by ruthless entrepreneurial imagination What is especially useful is that he does not just stick with small startups let alone dreamy inventors He finds innovation in big companies and even within governments Matt Ridley The Times

Market-Oriented Disinformation Research Carlos Diaz Ruiz, 2025-03-25 Market Oriented Disinformation Research explores the spread of false or misleading information online through the lens of marketing theory and consumer research It examines how the business models of digital platforms and advertising technology firms AdTech generate digital markets that incentivize the circulation of harmful content for profit Rather than viewing disinformation and misinformation as accidental byproducts the book proposes that they thrive in the current markets designed for digital advertising and

influencer marketing Readers will learn how the amplification of disinformation can be linked to social media's business model Examples include how social media algorithms promote addictive content how fake news sites use ad fraud to lure in advertising revenue and how some content creators rely on clickbait ragebait bots and conspiracy theories to boost their engagement metrics The book is a must read for scholars in journalism media studies and political communication as well as policymakers interested in the democratic governance of social media platforms In addition it calls for digital marketing advertising and brand management professionals to take responsibility for their ad spending by advocating for greater oversight over AdTech intermediaries to prevent unethical actors from monetizing the harmful content that polarizes society and undermines democratic institutions

The Friend Machine Victoria Hetherington, 2025-10-14 What does it mean to be alone to be in love and to make love in a world where artificial intelligence is increasingly present In this thought provoking and deeply personal exploration critically acclaimed novelist and nonfiction writer Victoria Hetherington delves into the rapidly evolving world of AI companionship The Friend Machine opens with a close examination of our lonesome zeitgeist then weaves together interviews with scientists social critics and other experts to tease out the complex relationships between humans and AI Successive chapters look at the philosophical psychological ethical economic and biological dimensions of this fast evolving technology The book then takes a compassionate and intimate look at the lives of individuals from diverse backgrounds who have sought and found companionship in AI As the lines between humans and machines continue to blur Hetherington finds the nature of our relationships will change in ways we're only beginning to imagine

Natural Language Generation Ehud Reiter, 2024-10-15 In late 2022 the prominence of Natural Language Generation NLG surged with the advent of advanced language models like ChatGPT While these developments have captivated both academic and commercial sectors the focus has predominantly been on the latest innovations often overlooking the rich history and foundational work in NLG This book aims to provide a comprehensive overview of NLG encompassing not only language models but also alternative approaches user requirements evaluation methods safety and testing protocols and practical applications Drawing on decades of NLG research the book is designed to be a valuable resource for both researchers and developers offering insights that remain relevant far beyond the current technological landscape Natural Language Generation focuses on data to text but also looks at other types of NLG including text summarization The book takes a holistic approach to NLG looking at requirements what users are looking for design data issues testing evaluation safety and ethical issues as well as technology The holistic approach is unique to this book and is very valuable for people building real world NLG systems and for academics and researchers who are interested in applied NLG The author who previously co-authored a seminal NLG book in 2000 emphasizes high level concepts and methodologies ensuring the material's longevity and utility The book is structured to balance technical depth with practical relevance including chapters on rule based and neural NLG approaches user requirements rigorous evaluation techniques and safety considerations Real world

applications particularly in journalism business intelligence summarization and medicine are explored to illustrate NLG's potential and scalability. With personal anecdotes and examples from the author's experiences, this book provides a unique and engaging perspective on the evolving field of NLG, making it an indispensable guide for those looking to harness the power of language generation technologies.

Misinformation and Society Yotam Ophir, 2025-06-25 A Comprehensive Guide to Understanding and Addressing Political and Scientific Misinformation. In our increasingly interconnected world, misinformation spreads faster than ever, influencing public opinion, political outcomes, and personal beliefs. In *Misinformation and Society*, Yotam Ophir takes an interdisciplinary approach to unravel the complexities of misinformation in its various forms. Offering invaluable insights into the history, psychology, and social impact of misinformation, this timely book provides you with the tools to critically analyze misinformation's origins, effects, and solutions. From understanding the cognitive processes that make individuals vulnerable to false information to exploring the societal impact of viral misinformation, *Misinformation and Society* delivers deep insights into one of the most pressing issues of our time. Drawing on research from fields such as communication, political science, and psychology, Ophir presents in-depth case studies of high-profile events such as Brexit and COVID-19, clearly demonstrating how misinformation has shaped public discourse. Through clear and engaging writing, the author presents evidence-based strategies to address misinformation in a variety of specific real-world contexts, such as conspiracy theories, public health disinformation, fabricated political news, and more. Requiring no previous background in the subject, *Misinformation and Society* is essential reading for undergraduate and graduate students in Media Studies, Political Science, Communication, and Public Health, as well as journalists, educators, policymakers, and general readers interested in media literacy, information integrity, and the challenges posed by misinformation in the Digital Age.

Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 *Designing Instruction with Generative AI* offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences. While instructional designers are a tremendous asset to higher education, not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations. Drawing on a wealth of research, professional experience, and strategic insights, this book equips new and seasoned teaching faculty and trainers with step-by-step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners. Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials, course design, and learning environments while supporting their digital literacies. Rather than introduce AI as a means of outsourcing subject area expertise, critical thinking, or cognitive processes, the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices. From optimizing course alignment and accessibility practices to fostering active learning, motivation, and engagement, educators will find new solutions to common teaching and learning challenges with greater
