ICT for Global Innovations and Solutions Saurav Bhattacharya, 2025-11-01. This ACSAR volume constitutes the referred proceedings of International Conference ICGIS 2025 Virtual Event held during April 26-27, 2025. ICGIS 2025 emphasizes innovation in interdisciplinary research and applications, showcasing transformative ideas across diverse domains. The volume constitutes 49 full papers out of numerous submissions. The event featured compelling conversations across a range of domains: Artificial Intelligence, Smart Infrastructure, Climate Adaptation, Renewable Energy, Cybersecurity, Digital Health, and Data-Driven Policy, united by a common vision of innovating toward a more sustainable and secure future.

Reshaping Marketing Science in Wholesaling and Retailing Tarnanidis, Theodore K., 2024-08-21. As consumer preferences shift with the continued innovation of digital technology in the marketing sector, traditional approaches to marketing in wholesaling and retailing become obsolete. With tools like artificial intelligence and eco-friendly advertising strategies, organizations move towards improved marketing tactics and sustainability. To reshape marketing science, businesses must adopt more sustainable and technological approaches to marketing through methods like data analysis, consumer behavior reporting, or targeted marketing strategies. *Reshaping Marketing Science in Wholesaling and Retailing* explores continuing trends in marketing science for wholesaling and retailing, such as marketing methods and principles. With a focus on data-driven insights and personalized experiences, the book focuses on sustainable options and the ethics of new retail technological innovations. This book covers topics such as e-commerce, social media, and consumer behavior and is a useful resource for consultants, economists, business owners, policymakers, academicians, researchers, and scientists.

Integrated Business Innovation Vijay Pandiarajan, 2025-12-12. *Integrated Business Innovation* shows how organizations can move beyond the buzz of artificial intelligence, particularly generative AI, and apply it thoughtfully to solve real-world business problems. While tools like ChatGPT and other large language models offer accessible and intuitive power, many companies struggle to extract lasting value because they fail to clearly define the problems they are trying to solve. This book addresses that gap by integrating the principles of design thinking with AI and other fourth industrial age technology capabilities, offering a structured approach to identifying business challenges and developing innovative, customer-centered solutions. Across 12 chapters, the book blends foundational insights with applications across industries such as healthcare, manufacturing, retail, government, and education. With a wide array of illustrative mini-cases woven throughout the book, including five expanded case studies in Part III, readers will learn how to recognize strategic opportunities, navigate implementation challenges, and unlock measurable business impact using AI. This book is a vital new resource for undergraduates, postgraduates, and professionals on executive education courses and will also appeal to leaders, practitioners, and consultants, equipping readers

Encyclopedia of Medical Devices and Instrumentation John G. Webster, 2006-04-07 The articles in The Encyclopedia of Medical Devices and Instrumentation focus on what is currently useful or is likely to be useful in future medicine. They answer the question: What are the branches of medicine and how does technology assist each of them? Articles focus on the practice of medicine that is assisted by devices rather than including, for example, the use of drugs to treat disease. The title is the only resource on the market dealing with the subject in encyclopedic detail. Accessible to practitioners with a broad range of backgrounds from students to researchers and physicians. Articles cover the latest developments such as nanotechnology, fiber optics, and signal processing.
