Beyond Code Daniel Plate,James Hutson,2025-09-02 AI powered coding tools are revolutionizing software development transforming programming from a specialized skill into an accessible educational practice across disciplines This book investigates how tools such as Cursor AI GitHub Copilot and Replit s Ghostwriter are dismantling traditional barriers to entry for learners particularly those from non STEM backgrounds by enabling natural language code generation intelligent debugging and interactive project based learning Bridging the gap between theoretical instruction and practical application the book serves as both a guide and a critical framework for integrating generative AI into curricula It highlights how these

tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing thereby making coding relevant and actionable for students in the humanities and beyond The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models This resource is essential for instructors seeking to demystify coding promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom

Moral Codes Alan F. Blackwell, 2024-08-06 Why the world needs less AI and better programming languages Decades ago we believed that robots and computers would take over all the boring jobs and drudgery leaving humans to a life of leisure This hasn't happened Instead humans are still doing boring jobs and even worse AI researchers have built technology that is creative self aware and emotional doing the tasks humans were supposed to enjoy How did we get here In Moral Codes Alan Blackwell argues that there is a fundamental flaw in the research agenda of AI What humanity needs Blackwell argues is better ways to tell computers what we want them to do with new and better programming languages More Open Representations Access to Learning and Control Over Digital Expression in other words MORAL CODE Blackwell draws on his deep experiences as a programming language designer which he has been doing since 1983 to unpack fundamental principles of interaction design and explain their technical relationship to ideas of creativity and fairness Taking aim at software that constrains our conversations with strict word counts or infantilizes human interaction with likes and emojis Blackwell shows how to design software that is better not more efficient or more profitable but better for society and better for all people Covering recent research and the latest smart tools Blackwell offers rich design principles for a better kind of software and a better kind of world
