**How to Teach AI** Rachelle Dené Poth, 2024. Get practical tools and strategies for teaching AI across the K-12 curriculum with this accessible guide. As AI continues to transform our world, educators have a responsibility to stay current with the changes and ensure that students have the necessary knowledge and skills to succeed in the future. Written by an educator who is currently teaching on this topic, *How to Teach AI* shares practical strategies and tools based on what good practice looks like in the classroom right now. Readers will build confidence in integrating AI into their curriculum so they can effectively prepare students for their careers. Taking a friendly and accessible approach, the book covers a range of topics related to AI, such as machine learning, robotics, and natural language processing, and includes examples of how these technologies are being implemented in different industries and their impact on education. The book includes a chapter dedicated to the ethics of AI, addressing issues around bias, intellectual property, student data privacy, and more. The book includes ideas for using generative AI in the classroom and tips for writing effective prompts. Activity ideas across content areas including computer science, economics, literature, music, and more. Time-saving ideas for teachers and study aids for students to explore AI-powered tool recommendations for teachers. Questions for reflection in every chapter. With examples from educators in the field and a variety of resources to apply in the classroom, this book helps educators become comfortable with this important topic and create meaningful learning experiences for their students. Audience: Elementary and secondary educators and technology coaches.

**Technology-Enabled Learning and Design Methodologies** Andrea Filatro, Carolina Costa Cavalcanti, 2024-12-30. *Technology Enabled Learning and Design Methodologies* offers a comprehensive and example-rich guide to the latest technological and methodological advancements in education. This book systematically organizes a rich variety of educational innovations into four distinct groups of teaching-learning methodologies, each with its own focus and disruptive potential: Creative methodologies centered on student protagonism and creativity, which shift the traditional roles in the teaching-learning process, empowering students to take an active leading role in their education and encouraging creative thinking and expression; Agile methodologies focused on time management and adaptability, which optimize students' time and attention through microlearning and other bite-sized content activities and assessments; Immersive methodologies driven by simulated real-world scenarios, which blur the boundaries between learning environments and real-life contexts in order to immerse learners in challenging story-driven environments linked to clear learning objectives; Analytical methodologies based on computation power, which support personalized adaptive and evidence-based teaching and learning by collecting and processing student data. Through a practical dialogical approach filled with visual resources and real-world examples, the authors provide solid theoretical foundations for their methodologies, positioning them within a broader spectrum that goes beyond mere consumption of isolated techniques or technologies. This will be a relevant resource for

current and aspiring instructional designers educational technologists subject matter experts teaching faculty researchers and other stakeholders involved in face to face distance or hybrid education      *New Technology in Education and Training* Jon-Chao Hong,2025-07-22 This book presents selected papers from the 6th International Conference on Advances in Education and Information Technology AEIT 2025 held in Fukuoka Japan from January 10 12 2025 With a worldwide increase in the development of new technology such as artificial intelligence AI and extended reality to enhance learning in school and industry settings there is a progressive need to study the implementation of new technology in education and training Of global concern in this area include issues such as teaching approaches classroom management and the evaluation of learning effectiveness This book examines these topics and serve as a useful resource for beginner educators academics entrepreneurs and professionals who are working in the field of implementing new technology in education and training
