AI Engineering Chip Huyen, 2024-12-04 Recent breakthroughs in AI have not only increased demand for AI products they ve also lowered the barriers to entry for those who want to build AI products The model as a service approach has transformed AI from an esoteric discipline into a powerful development tool that anyone can use Everyone including those with minimal or no prior AI experience can now leverage AI models to build applications In this book author Chip Huyen discusses AI engineering the process of building applications with readily available foundation models The book starts with an overview of AI engineering explaining how it differs from traditional ML engineering and discussing the new AI stack The more AI is used the more opportunities there are for catastrophic failures and therefore the more important evaluation becomes This book discusses different approaches to evaluating open ended models including the rapidly growing AI as a judge approach AI application developers will discover how to navigate the AI landscape including models datasets evaluation benchmarks and the seemingly infinite number of use

cases and application patterns You ll learn a framework for developing an AI application starting with simple techniques and progressing toward more sophisticated methods and discover how to efficiently deploy these applications Understand what AI engineering is and how it differs from traditional machine learning engineering Learn the process for developing an AI application the challenges at each step and approaches to address them Explore various model adaptation techniques including prompt engineering RAG fine tuning agents and dataset engineering and understand how and why they work Examine the bottlenecks for latency and cost when serving foundation models and learn how to overcome them Choose the right model dataset evaluation benchmarks and metrics for your needs Chip Huyen works to accelerate data analytics on GPUs at Voltron Data Previously she was with Snorkel AI and NVIDIA founded an AI infrastructure startup and taught Machine Learning Systems Design at Stanford She s the author of the book Designing Machine Learning Systems an Amazon bestseller in AI AI Engineering builds upon and is complementary to Designing Machine Learning Systems O Reilly

Surveillance Education Nolan Higdon,Allison Butler,2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education

Success Calendar Gabriel Barnes,AI,2025-03-04 Success Calendar offers more than just a way to track appointments it s a personalized system designed to revolutionize your daily routines and drive you toward achieving your most important goals This book introduces a structured method for integrating goal setting accountability measures and optimized daily routines directly into your calendar transforming it into a dynamic tool for personal and professional growth Discover how to strategically align your daily activities with your long term objectives bridging the gap between intention and accomplishment The book is divided into three key sections starting with foundational concepts like defining success

accountability and effective routines It then details the practical application of a personalized calendar system offering a step by step guide to integrating goals establishing accountability and designing efficient routines Finally it focuses on sustaining momentum and adapting the system to evolving needs Case studies illustrate how others have successfully implemented the Success Calendar system achieving greater fulfillment reduced stress and lasting success in both their business and personal lives This unique approach emphasizes personalization making it a template for a life lived by design not by default

Managing Innovation Inside Universities Randolph Hall,2024-06-10 This book offers guidance on capturing the creative forces of the faculty staff and students at universities Given their unique and central role in America and the world it examines how university research learning and service can be integrated to address the needs of society as it is both enabled and changed by technology In turn the book assesses the challenges and opportunities for universities to be more successful and impactful through innovation viewing universities as integrated systems It demonstrates how change can occur both within the knowledge economy and because of innovations within it In doing so the book provides insights into how universities can prosper and lead in a world that is constantly changed by the innovations that universities and industry jointly create The book serves as a guide for higher education policymakers funders donors board members stakeholders and leaders chairs deans provosts presidents through its systematic vision for university innovation and service to society It will also benefit researchers studying innovation in organizations illustrating how systematic approaches arising from management science and operations research can be used toward positive change Lastly strategic partners in industry government and foundations seeking opportunities for partnerships and collaboration with universities will also find it useful
