**These Strange New Minds** Christopher Summerfield,2025-03-11 An insider look at the Large Language Models LLMs that are revolutionizing our relationship to technology exploring their surprising history what they can and should do for us today and where they will go in the future from an AI pioneer and neuroscientist In this accessible up to date and authoritative examination of the world s most radical technology neuroscientist and AI researcher Christopher Summerfield explores what it really takes to build a brain from scratch We have entered a world in which disarmingly human like chatbots such as ChatGPT Claude and Bard appear to be able to talk and reason like us and are beginning to transform everything we do But can AI think know and understand What are its values Whose biases is it perpetuating Can it lie and if so could we tell Does their arrival threaten our very existence These Strange New Minds charts the evolution of intelligent talking machines and provides us with the tools to understand how they work and how we can use them Ultimately armed with an understanding of AI s mysterious inner workings we can begin to grapple with the existential question of our age have we written ourselves out of history or is a technological utopia ahead

*Surveillance Education* Nolan Higdon,Allison Butler,2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in
