AI in Financial Decision Making Arif Ahmed, Veena Hingarh, Arnaaz Ahmed, 2025-12-22. Written by experts who have trained global audiences in finance and designed real-life solutions, this book provides exactly what financial decision makers need: a survival kit for disruptive times. The increasing use of AI has posed challenges and brought benefits at organizational and individual levels. However, financial decision makers are often not equipped with the necessary skills and may even feel threatened by the speed at which AI is automating the decision-making process. This book takes a balanced look at how AI and ML are applied across operations, finance, and risk management. It is not meant to turn finance professionals into coders; instead, it shows clearly how these tools can be used to tackle real business problems. This will help financial decision makers actively engage with projects involving the implementation of ML tools in their organizations. Beyond simple ML tool identification, the book goes one step further and provides representative codes that the reader can use by tweaking information to make it relevant to their own situation. To keep up with the rapid developments in AI and ML, this book is accompanied by a website where tools and codes will be regularly updated as standards change. Anyone involved

in financial decision making will find this book to be an invaluable resource whether a CFO finance director management accountant budget officer auditor strategic planner or early career professional *Guide to Microforms in Print* ,1995
