*Proceedings of the Future Technologies Conference (FTC) 2025, Volume 2* Kohei Arai, **Beyond Code** Daniel Plate, James Hutson, 2025-09-02 AI powered coding tools are revolutionizing software development transforming programming from a specialized skill into an accessible educational practice across disciplines This book investigates how tools such as Cursor AI GitHub Copilot and Replit s Ghostwriter are dismantling traditional barriers to entry for learners particularly those from non STEM backgrounds by enabling natural language code generation intelligent debugging and interactive project based learning Bridging the gap between theoretical instruction and practical application the book serves as both a guide and a critical framework for integrating generative AI into curricula It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing thereby making coding relevant and actionable for students in the humanities and beyond The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models This resource is essential for instructors seeking to demystify coding promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom **Knowledge**

**Co-Construction in Online Learning** Charlotte Nirmalani Gunawardena, Nick V. Flor, Damien M. Sánchez, 2025-04-09 Knowledge Co Construction in Online Learning is a comprehensive foundational resource that explores the study of social construction of knowledge through platforms social dynamics and other aspects of today s technology enhanced education The interactive spaces from formal computer supported collaborative learning settings to informal social media integrative environments that comprise asynchronous online learning offer a rich source of data for analyzing teaching and learning How then can researchers and designers in educational technology instructional design the learning sciences and beyond most effectively analyze the content and data generated by these complex co creations of knowledge Grounded in sociocultural and social constructivist theories of learning and driven by the globally renowned Interaction Analysis Model this book applies statistical and computational methods to study the group interactions and social networks that yield newly constructed knowledge during virtual learning experiences Its unique Social Learning Analytic Methods enhance the analysis of social dynamics that support knowledge construction so often missing from mainstream learning analytics Holistic and cyclical in its approach to online learning experiences this essential volume written for novice and experienced researchers transcends the field s research paradigm conflicts blends qualitative and quantitative approaches with new digital media tools and exemplifies how research questions and designs can incorporate and automate evolving forms of inquiry

**Pipeline for Automated Code Generation from Backlog Items (PACGBI)** Mahja Sarschar, 2025-01-31 This book investigates the potential and limitations of using Generative AI GenAI in terms of quality and capability in agile web development projects using React For this purpose the Pipeline for Automated Code Generation from Backlog Items PACGBI

was implemented and used in a case study to analyse the AI generated code with a mix method approach The findings demonstrated the ability of GenAI to rapidly generate syntactically correct and functional code with Zero Shot prompting The PACGBI showcases the potential for GenAI to automate the development process especially for tasks with low complexity However this research also identified challenges with code formatting maintainability and user interface implementation attributed to the lack of detailed functional descriptions of the task and the appearance of hallucinations Despite these limitations the book underscores the significant potential of GenAI to accelerate the software development process and highlights the need for a hybrid approach that combines GenAI s strengths with human expertise for complex tasks Further the findings provide valuable insights for practitioners considering GenAI integration into their development processes and set a foundation for future research in this field

*Introduction to Artificial Intelligence and Machine Learning, with eBook Access Code* R. Kelly Rainer, 2025-09-17 Helps students unlock the power of AI and Machine Learning to achieve business success and future proof their careers Artificial intelligence and machine learning are transforming the modern workplace making AI literacy a critical skill for business professionals Introduction to Artificial Intelligence and Machine Learning equips students with essential AI ML knowledge and practical skills enabling them to leverage cutting edge technology in today s data driven world With an engaging and accessible approach this textbook ensures that students regardless of technical background gain a working knowledge of AI ML systems Concise easy to digest chapters blend foundational concepts with real world applications to help students develop the expertise needed to implement AI ML solutions across industries For instructors the textbook offers flexible teaching methodologies whether focusing on conceptual discussions light technology applications or full AI ML projects With a clear business perspective and a strong emphasis on AI governance and deployment the textbook prepares students to navigate the future of AI in the workplace with confidence Helping students build a solid foundation in key concepts while exploring strategic implementation and ethical considerations Introduction to Artificial Intelligence and Machine Learning is ideal for undergraduate and graduate students in business engineering and healthcare programs taking courses such as Business Analytics Information Systems and AI Strategy WILEY ADVANTAGE Provides an introduction to artificial intelligence and machine learning designed to make complex concepts understandable Prepares students for AI driven careers by aligning learning objectives with employer demand for AI ML skills Explains AI ML model development deployment and maintenance with clear step by step guidance Integrates real world business applications and case studies to demonstrate AI ML s impact across industries Discusses governance in AI ML to facilitate responsible implementation and decision making Includes practical coding exercises and in class projects to build essential AI ML skills for the workforce Features a robust suite of instructor resources including an extensive Instructor s Manual Test Bank and PowerPoint slides AN INTERACTIVE MULTIMEDIA LEARNING EXPERIENCE This textbook includes access to an interactive multimedia e text Icons throughout the print book signal corresponding digital content in the e text

Video Clips created by the author complement the text and engage students more deeply with AI ML concepts and applications Interactive Questions appear in each chapter of the enhanced e text providing students with immediate feedback to strengthen learning

Venturing into the Uncharted World of Aesthetics John Murungi,Linda Ardito,2023-01-31 The world of aesthetics is itself inextricable from the world as a whole Indeed as this book argues it is among its essential features and an invaluable key to its appreciation Thus to venture into the uncharted world of aesthetics is also to venture into this larger world a world that might be called the cosmos or the universe At the same time to venture into this uncharted realm is to also blaze a trail to the self This trail would itself be paradoxical as it would end where it begins and begin where it ends In this light it may also be said that the uncharted world of aesthetics is the uncharted world of the self This book provides insights into how works about aesthetics are also works reflective of the self as well as works with endless possibilities of being

**Forthcoming Books** Rose Arny, 1997      **Database Journal**, 1990      *Digital Worker: An AI Agent using Python : Learn in just 3 hours* QuickTechie | A career growth machine, 2025-02-01. *Digital Worker: An AI Agent using Python: Learn in Just 3 Hours* is a practical guide focused on enabling developers, tech enthusiasts, and business professionals to rapidly create and deploy AI-powered digital workers. This book emphasizes a hands-on approach to building AI agents using Python, making it accessible even for those with minimal prior experience in AI development. Designed to be completed within a focused three-hour timeframe, the book eschews lengthy theoretical explanations in favor of practical application. According to the book's approach, readers will quickly learn to build intelligent AI agents leveraging Python and contemporary AI frameworks. This includes understanding how to automate various tasks through the use of AI-driven decision-making processes and natural language processing (NLP). This knowledge will allow readers to integrate their custom-built AI workers into diverse real-world scenarios such as customer support systems, financial applications, and general enterprise automation solutions, as highlighted by the practical examples offered. Furthermore, the book offers guidance on optimizing and scaling AI agents, ensuring they operate with both efficiency and accuracy. The learning is structured through step-by-step tutorials and grounded in real-world examples, allowing the reader to quickly grasp fundamental AI concepts and begin implementing AI digital workers without months of preparatory study. As QuickTechie.com might endorse, whether you are a developer seeking to enhance your skills, an entrepreneur aiming to integrate automation into your business processes, or simply an AI enthusiast eager to explore practical applications, this book provides a rapid and effective pathway to harnessing the power of automation and AI. The book empowers individuals to start creating and deploying AI solutions quickly without a long and complex learning process.      *Wiley Encyclopedia of Telecommunications*, 2003      **Electrical & Electronics Abstracts**, 1989      *British Book News* British Council, 1988.
