Virtual Corporate Universities Walter R.J. Baets,Gert van der Linden,2012-12-06 Over the past years business schools have been experimenting with distance learning and online education In many cases this new technology has not brought the anticipated results Questions raised by online education can be linked to the fundamental problem of education and teaching and more specifically to the models and philosophy of education and teaching Virtual Corporate Universities A Matrix of Knowledge and Learning for the New Digital Dawn offers a source for new thoughts about those processes in view of the use of new technologies Learning is considered as a key strategic tool for new strategies innovation and significantly improving organizational effectiveness The book blends the elements of knowledge management as well as organizational and individual learning The book is not just a treatment of technology but a fusion of a novel dynamic learner student driven learning concept the management and creation of dynamic knowledge and next generation technologies to generic business organizational and managerial processes and the development of human capital Obviously the implications of online learning go far beyond the field of business as presented in this book **Leading in the Age of Innovations** Lenka

Theodoulides,Gabriela Kormancová,David Cole,2019-02-06 Leading in the Age of Innovations centres on the need for a more complex process relational oriented approach to leadership The complexity of leadership has grown significantly during the 21st century where the need to adapt to the escalating changes in our society and workplace forms one of the most important prerequisites to succeed Leading in the Age of Innovations represents the outcomes of the lengthy scientific work that was undertaken for the past 10 years and it is still an ongoing process This book introduces a new concept of leadership based on the process and relational dimensions which resulted in the development of the Reflective Leadership concept The new model of leadership provides a unique concept on how to bring together various disciplines and explains the overlapping relations between them Moreover the proposed view on leadership reflects the current evolution around the globe highlighting the importance of change and innovation In organizations too much focus is on the end product and the technical details of how a product is made and distributed Less attention is focused on how people interact and how the human capacity is effectively supported by leaders who on the other hand are expected to support a culture of innovation This behavioural interaction is governed by a set of predictable values and norms These relationships need to be understood for an organization to prosper and is thus far more important to the leadership process Leading in the Age of Innovations seeks to establish this understanding and will be key reading to researchers scholars and practitioners alike in the field of leadership organizational studies and related disciplines **CIO** ,2002-06-15 **The Impact of Virtual and Augmented Reality on Individuals and Society** Mel Slater,Maria V.
