Technology and Innovation Richard A. Gershon, 2025-01-27 The **De Gruyter Handbook of Media Technology and Innovation** brings together scholars from around the world to provide key insights on emerging technology trends and issues related to the fields of media management, information technology, product design, planning, and digital lifestyle. This handbook is about the power of good ideas. It's about those business enterprises, government planners, educators, and entrepreneurs that have harnessed the power of good ideas to become real difference makers in the world we live in. Keeping pace with fast-paced technology change requires ongoing assessment and reassessment of the media management and technology fields to address important questions and emerging issues. A major premise of this book is that given the complex and ever-changing state of media technology, we have a responsibility and obligation to engage in a broader interdisciplinary dialogue whose purpose is to understand the current and future state of media technology and innovation as well as to appreciate the social impact that such technologies have on business, education, and the general public. Forecasting the future as any weatherperson or stock broker can tell you is a risky business. But in this book, we use the phrase "the creative next step" as a way to talk about the future and what we can expect in terms of the opportunities and challenges going forward.

Mobilities in Remote Places Phillip Vannini, 2023-07-21 **Mobilities in Remote Places** explores the meanings, challenges, and opportunities of remoteness as practiced and experienced by those who live and work in some of the world's most remote communities. As mobilities around the world proliferate in countless forms, the meanings of remoteness undergo significant change. Places once considered impossibly distant have appeared to become closer, more accessible, and less distinct from global centers of geopolitical power. But instead of disappearing altogether, configurations of remoteness evolve, manifesting themselves through new possibilities, new challenges, and new insecurities. Drawing from a variety of case studies from around the globe, the contributors of the book examine remoteness as an outcome of evolving mobility constellations. Rather than defining remoteness as an absolute or objective time-distance condition, the book shows how remoteness is a

practice experience and representation that is situated relational and emergent This collection of original and thought provoking chapters will be of interest to students and researchers in the humanities and social sciences with an interest in mobilities place and human geography **Network World** ,1997-02-03 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce International Gas Engineering and Management ,2002 **Organizational Behaviour** Nancy Langton,Stephen P.
