Berman,2018-01-15 Despite what you may have read in the popular press and in social media Precision Medicine is not  
devoted to finding unique treatments for individuals based on analyzing their DNA To the contrary the goal of Precision  
Medicine is to find general treatments that are highly effective for large numbers of individuals who fall into precisely  
diagnosed groups We now know that every disease develops over time through a sequence of defined biological steps and  
that these steps may differ among individuals based on genetic and environmental conditions We are currently developing  
rational therapies and preventive measures based on our precise understanding of the steps leading to the clinical expression  
of diseases Precision Medicine and the Reinvention of Human Disease explains the scientific breakthroughs that have  
changed the way that we understand diseases and reveals how medical scientists are using this new knowledge to launch a  
medical revolution Clarifies the foundational concepts of Precision Medicine distinguishing this field from its predecessors  
such as genomics pharmacogenetics and personalized medicine Gathers the chief conceptual advances in the fields of  
genetics pathology and bioinformatics and synthesizes a coherent narrative for the field of Precision Medicine Delivers its
