

## How Prompt Engineering Works

Note: Prompt engineering designs and optimizes prompts for language models. It's important in NLP and language generation. Prompt formats guide the model and can be used for tasks like product descriptions or conversational AI.

Reliable prompt formats exist, but exploring new formats is encouraged.

"{your input here}" is a placeholder for text or context

## Rules of Thumb and Examples

**Rule #5 – Fine-tune if Rule #4 doesn't work**

Fine-tuning improves model performance by training on more examples, resulting in higher quality results, token savings, and lower latency requests.

GPT-3 can intelligently generate plausible completions from few examples, known as **few-shot learning**.

Fine-tuning achieves better results on various tasks without requiring examples in the prompt, saving costs and enabling lower-latency requests.

**Example Training Data**

```
{ "prompt": "<input>", "completion": "<ideal output>" }
{ "prompt": "<input>", "completion": "<ideal output>" }
{ "prompt": "<input>", "completion": "<ideal output>" }
...

**Rule #6 – Be specific. Omit needless words.**

ChatGPT, write a sales page for my company selling sand in the desert, please write only a few sentences, nothing long and complex.

Write a 5-sentence sales page, sell sand in the desert.

**Rule #7 – Use leading words to nudge the model towards a pattern**

Write a Python function that plots my net worth over 10 years for different inputs on the initial investment and a given ROI

```
# Python function that plots net worth over 10
# years for different inputs on the initial
# investment and a given ROI
```

```
import matplotlib
```

```
def plot_net_worth(initial, roi):

## Bonus Prompt – Let ChatGPT Design the Optimal Prompt

New models are created frequently, and the performance of subsequent models can be an order of magnitude. You are a robot for creating prompts. You need to gather information about the user's goals, examples of preferred output, and any other relevant contextual information.

The prompt should contain all the necessary information provided to you. Ask the user more questions until you are sure you can create an optimal prompt.

Your answer should be clearly formatted and optimized for ChatGPT interactions. Be sure to start by asking the user about the goals, the desired outcome, and any additional information you may need.
