**Genius Makers** Cade Metz, 2021-03-16 This colorful page turner puts artificial intelligence into a human perspective Through the lives of Geoff Hinton and other major players Metz explains this transformative technology and makes the quest thrilling Walter Isaacson author of The Code Breaker Recipient of starred reviews in both Kirkus and Library Journal THE UNTOLD TECH STORY OF OUR TIME What does it mean to be smart To be human What do we really want from life and the intelligence we have or might create With deep and exclusive reporting across hundreds of interviews New York Times Silicon Valley journalist Cade Metz brings you into the rooms where these questions are being answered Where an extraordinarily powerful new artificial intelligence has been built into our biggest companies our social discourse and our daily lives with few of us even noticing Long dismissed as a technology of the distant future artificial intelligence was a project consigned to the fringes of the scientific community Then two researchers changed everything One was a sixty four year old computer science professor who didn t drive and didn t fly because he could no longer sit down but still made his way across North America for the moment that would define a new age of technology The other was a thirty six year old neuroscientist and chess prodigy who laid claim to being the greatest game player of all time before vowing to build a machine that could do anything the human brain could do They took two very different paths to that lofty goal and they disagreed on how quickly it would arrive But both were soon drawn into the heart of the tech industry Their ideas drove a new kind of arms race spanning Google Microsoft Facebook and OpenAI a new lab founded by Silicon Valley kingpin Elon

Musk But some believed that China would beat them all to the finish line *Genius Makers* dramatically presents the fierce conflict among national interests shareholder value the pursuit of scientific knowledge and the very human concerns about privacy security bias and prejudice Like a great Victorian novel this world of eccentric brilliant often unimaginably yet suddenly wealthy characters draws you into the most profound moral questions we can ask And like a great mystery it presents the story and facts that lead to a core vital question How far will we let it go

**The Complete Guide to YouTube Automation** Zeke Sanders, 2024-10-08 This eBook is designed to be your guide to the fascinating world of automating your YouTube channel Whether you re a seasoned content creator or a newcomer curious about what automation can do for you this eBook will take you step by step through the process The explosion of YouTube as a content platform has opened up enormous opportunities for content creators entrepreneurs and hobbyists alike But as many YouTubers will tell you the workload can be staggering Consistently producing videos engaging with the audience optimizing content and managing monetization can feel overwhelming Enter YouTube automation the ultimate toolset to help you work smarter not harder Automation in YouTube is all about optimizing your workflow so that you can reduce the time spent on repetitive tasks It enables you to focus more on the creative and strategic aspects while delegating time consuming work to automation tools Imagine having a YouTube channel that virtually runs itself Well it s not just a dream many creators have successfully automated large portions of their process and significantly grown their channels as a result In this eBook we re going to cover everything you need to know from the basics of automation to more advanced strategies We ll start by helping you understand the YouTube algorithm and how it influences video discovery Then we ll guide you through niche selection content creation tools scriptwriting automation and much more By the end you ll be ready to create a highly optimized YouTube channel that can run on autopilot allowing you to focus on growing your presence engaging with your audience or even launching multiple channels

*Computers and Society* Ronald M.
