**Abstract**—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and blood pressure (BP) of sedentary, middle-aged men. The subjects were divided into two groups: a control group and an exercise group. The exercise group performed a 10-week training program consisting of aerobic and resistance exercises. The HR and BP were measured at baseline and at the end of the 10-week program. The results showed that the exercise group had a significant decrease in HR and BP compared to the control group. The HR decreased from 72 to 68 beats per minute, and the BP decreased from 120/80 to 110/70 mmHg. The control group showed no significant change in HR and BP. The findings suggest that a 10-week training program can effectively reduce HR and BP in sedentary, middle-aged men.

*Professional Communication and Network Interaction* Heidi A. McKee, James E. Porter, 2017-06-14 Drawing from classical and contemporary rhetorical theory and from in-depth interviews with business professionals, the authors present a case-based approach for exploring the changing landscape of professional communication.

**The Nine** Phil Simon, 2023-04-06 As COVID has receded, companies such as Apple, Amazon, Google, Salesforce, and Twitter have severely restricted or even eliminated remote work. Ditto for countless less iconic firms and small businesses. At a high level, executives and managers at these organizations are trying to turn back the clock to 2019. There's just one problem though: For a bevy of reasons, they won't succeed. In many ways, the workplace of 2023 already differs from its pre-pandemic counterpart. In some cases, it's downright unrecognizable. What's more, this gap will only intensify in the coming years. Blame or thank it if you like: powerful economic, societal, geopolitical, and technological forces. They include generative AI, automation, dispersed workforces, blockchain, immersive technologies, employee empowerment, and the return of systemic inflation. Brass tacks: The workplace is undergoing a massive, irrevocable shift. The only question for business leaders is: What should you do about it? In *The Nine: The Tectonic Forces Reshaping the Workplace*, award-winning author and world-renowned workplace tech expert Phil Simon answers that question in spades. He peers into the dizzying and chaotic future of work. Simon slices through the hype surrounding nascent trends and newfangled technologies. Insightful, timely, and essential, *The Nine* clearly explains what's really happening, why, and how business leaders can navigate the dramatically different workplace of the future.
