Becoming Machines: 400 Years of Man's Submission to the Machine Denis Collin, For four centuries the modern world has been dominated by machinery It was born with capitalist production It quickly became symbiotic with capitalist development which found its driving force in mechanics Calculation predictability the power of abstraction the categories of modern science were well suited to this new mode of production which was about to invade the planet However all trends that lead to the elimination of life in favor of the mechanical lead to a general commodification of human life and a loss of our being in the world Turning nature into a mere raw material replacing vital processes with mechanical procedures all this leads to treating human beings as things turning them into predictable beings We therefore need to think in terms of resistance to this movement The involution of the great Enlightenment movement towards the formation of a techno scientific steel cage poses the task of rediscovering a sense of nature and life of rethinking rootedness beyond what Simone Weil had outlined of remaking nature as a sphere of resonance

The Great Wave Michiko Kakutani,2024-02-20 An urgent examination of how disruptive politics technology and art are capsizing old assumptions in a great wave of change breaking over today s world creating both opportunity and peril from the Pulitzer Prize winning critic and author of the New York Times bestseller *The Death of Truth* In this dazzling and brilliant book Michiko Kakutani explains the cascading chaos of our era and points to ways that we can regain some stability Walter Isaacson author of *Elon Musk* The twenty first century is experiencing a watershed moment defined by chaos and uncertainty as one emergency cascades into another underscoring the larger dynamics of change that are fueling instability across the world Since the global financial crisis of 2008 people have increasingly lost trust in institutions and elites while seizing upon new digital tools to sidestep traditional gatekeepers

As a result powerful new voices once regarded as radical unorthodox or marginal are disrupting the status quo in politics business and culture Meanwhile social and economic inequalities are stoking populist rage across the world toxic partisanship is undermining democratic ideals and the internet and AI have become high speed vectors for the spread of misinformation Writing with a critic s understanding of cultural trends and a journalist s eye for historical detail Michiko Kakutani looks at the consequences of these new asymmetries of power She maps the migration of ideas from the margins to the mainstream and explores the growing influence of outsiders those who have sown chaos and fear like Donald Trump and those who have provided inspirational leadership like Ukraine s president Volodymyr Zelensky At the same time she situates today s multiplying crises in context with those that defined earlier hinge moments in history from the waning of the Middle Ages to the transition between the Gilded Age and the Progressive Era at the end of the nineteenth century Kakutani argues that today s crises are not only signs of an interconnected globe s profound vulnerabilities but also stress tests pointing to the essential changes needed to survive this tumultuous era and build a more sustainable future
