important point of this software is that it can automatically focus the face of a person and edit only selected clips of the person to make a complete video. Users only need to prepare the video they want to edit and a photo of the main character. Then upload both to the software and AI Intelligence will automatically edit it, providing the user with a way to download and save it. After editing the main character they need, we applied our application to an example video using the Marvel character Hawkeye as he appears in End Game and tried many experiments with the clip. Eventually we tried many experiments with the clip and finally got a video of our selected character. The results show that this software saves the user a lot of time and is highly efficient. All operations are carried out by AI.
